MS-60 (UNCIRCULATED) Strictly uncirculated showing no evidence of rubbing or friction. However, no further qualifications are necessary. Will be bag marked and/or weakly struck may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

Vol. XXII No. 24 | June 15, 1984 | Single copy price: $2.50

ALL MS-65 MORGAN DOLLARS NOW BID AT LEAST $200

Bullion Slips Downward; Activity Still Bright in Most Areas

The Market in Depth

In 1982, the U.S. Government changed the metal composition in Lincoln cents. They now weigh 2.5 grams; zinc content is 97.6% and copper is 2.4%. This new alloy content has created a modern rarity. On some cents the copper plating process has been deleted. This creates a cent that looks like the 1943 zinc cent. There have not been any mintage figures established at this time, but we have monitored some buy prices: The following prices are offers to buy nice BU coins.

1982-P, D $200
1983-P $185
1983-D $200
1984-P, D $200

This past week has seen a number of dealers attempting to buy MS-65 dollars. The 1886-P and 1887-P Morgan has now reached $200 bid in MS-65 condition. This indicates that there are a number of dealers out there willing to purchase nice MS-65 dollars (MS-65+?) for their inventories. We have noticed that there are not too many dealers willing to sell their MS-65 dollars at or under current bid. Most want substantially over ask.

This point brings up the question of grading to buy an MS-65 versus to sell an MS-65 dollar. Over the last several years grading has changed toward a more conservative style. This new style has served to create "The Great Debate". When selling an MS-65, one thinks, "this is close enough". But, when buying, one looks with both eyes and thinks, "I don't think this is quite nice enough". This two-sided thinking sums up today's MS-65 grade. Some dealers are looking for; full strike, no marks on face, no marks in field, and no marks on the breast feathers. (But, does this description fit the MS-65 grade or something a bit higher as in MS-67?).

Currently, there are a few major buyers of strictly graded MS-65 dollars, who are looking for coins which have the following characteristics: They are sharply struck, have minimal bagmarks on the face and breast feathers, and are relatively free of marks in the field. This description differs immensely from our earlier one. And to think that one can classify a group of coins into one category, as in MS-65, is almost negligent. All coins must be viewed as to their own merits. The greatest problem encountered by the majority of all dealers is; from all the Morgan dollars they feel should be accepted as MS-65, approximately ten per cent actually are accepted. Maybe the ones not accepted should be called—MS-64???

This Week's Market

CENTS: The 1944-P and 1945-P BU cent rolls have advanced to $10.50 each and remain quite strong. The 1983-P Lincoln cent with the reverse double die has been offered at: XF - $110; AU - $125; and BU - $175.

As was noted last week, Lincoln cent rolls are extremely weak. There are many minus signs on a majority of the rolls as they seek a level of saleability.

NICKELS: The BU Jefferson roll market is still seeking lower levels with the exception of wartime rolls. They are still quite active with bids being advanced again this week on most issues. BU Buffalo nickel rolls have remained quiet this past week with very little action reported.

DIMES: Roosevelt dime rolls were still actively traded at current levels. BU single sets slipped lower this week to $165. Nonetheless, BU roll sets increased to $8600. This occurred because it is much more difficult to locate an original roll set than it is to find single sets. The 1936-D, 37-D and 38-D Mercury dimes adjusted downward slightly. There are a few bidders for the 1982 no 'P' dime (strong strike) at $100 for BU's.

QUARTERS: Although there is only one plus sign on BU Washington quarter rolls this week, there is still a number of buyers at current levels. The MS-65 quarters from 1932 to 1939 showed various plus signs as these coins are difficult to locate in strict MS-65 condition. There is also activity in some other dates although they did not plus this week.

HALVES: Walking Liberty halves are once again looking attractive to some dealers. Aside from the usual MS-65 buyers, there are now buyers for original rolls of 1941-P thru 1945-P at a higher $1500 per roll. Various rolls of Franklin halves have again increased.

1955-P $290	1959-D $245
1956-P $295	1960-P $175
1957-P $295	1963-P, D $158

DOLLARS: Ike dollar roll sets have once again fallen; new bid is now $3000. Nice original Morgan dollar rolls are quite popular again, with many advances. There are just not enough original rolls out there to satisfy demand. New bids:

1879-S $1225	1885-O $860
1880-S $1200	1886-P $860
1881-O . . . . . $ 950	1887-P $860
1881-S $1175	1897-P $975
1883-O . . . . . $ 860	1900-O $950
1884-P $1100	1904-O $860
1884-O . . . . . $ 860	

PROOF SETS and MINT SETS: The 1984 is now beginning to surface with a tighter spread over the past week. There have been buys as high as $14 per set, while one offer to sell was monitored at $14.75 each. The 1983 "no S" set is now bid at $665 per set. Most of the silver proof sets remained stable except for the very active 1964 set. Bid is now $13. The 1947 and 1949 mint sets are now bid at a lower $725 and $650 respectively.

COMMEMORATIVES: There were a few increases in XF/AU commemoratives this past week, but for the most part, activity appeared quiet. Lower bids appeared on Washington commemoratives at: BU - $7.25 and Proof - $8.

TYPE: Type coins appeared to be ignored for the most part. Proof-65 Mercury dimes and Walking Liberty halves did fall to $350 and $760 respectively. Most dealers are still looking for practically flawless material.

GOLD: With gold falling so much this past week, it was bound to have an effect on some U.S. gold issues. Most of the changes were on the minus side, except for $20 gold pieces. Both, the Liberty and the Saint Gaudens, are wanted again and especially in MS-60 grade.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $373.75 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 UNCIRCULATED Strictly uncirculated, showing no evidence rubbing or friction. However no further qualifications are necessary. It will be bag marked and/or weak, struck, may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

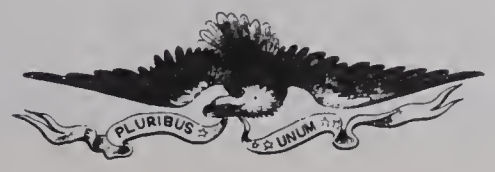
DEALER ACTIVITY AND WANT LISTS STILL EXTENSIVE

Gold and Silver Lower Again

The Market in Depth



With gold and silver on the decline, one would think that the rare coin market might tend toward the same direction But, at this time, activity appears very strong in many areas. The BU roll market, in silver related issues, has to be the strongest area of the market. Many dealers and their customers alike, are now realizing the future value of these original rolls.

Large quantities of silver coinage has been melted over the years and it became especially profitable when silver reached $50 per ounce. Many BU silver coins were melted without regard for future rarity. Because of this disregard, survival rate for silver coinage can only be estimated. Throw in the fact, that many coins were put into circulation originally, and you have major reasons for BU silver rolls advancing.

Also on the rise are original BU Morgan dollar rolls. Original mintage figures for silver dollars are available in various books. As mentioned earlier with BU silver rolls the low survival rate of silver dollars helps create some of the value. In addition, Congress authorized the melting of 270,232,722 silver dollars through the Pittman Act of 1918. Aside from original BU rolls being difficult to locate, most dealers are willing to pay ahead of the market in hopes of finding at least, a small percentage of choice to gem coins.

There is quite a difference between MS-60 silver dollars, original BU rolls, and original BU bags. One must understand, that single MS-60 Morgan dollars are readily available at prices under original BU roll prices. Thus, it follows, that original bags are sought by many dealers at a rate much higher than original BU rolls.

After reaching recent highs a few months ago, $20 gold Liberties and St. Gaudens began settling downwards. That is, until the last couple weeks. Now, despite gold moving down, twenties, are again moving up. This new trend may have resulted from an initial over reacting by the market, sending twenties downward. Thus, the new rash of price increases.

This Week's Market

CENTS: The 1983-P Lincoln cent with the reverse double die has heen offered again at: XF - $110; AU - $125; and BU - $175. This week offers to buy were: AU - $100; Ch BU - $150.

There are still some "minus" signs popping up on BU Lincoln rolls. The 1943-P, D, S cents all are lower this week.

NICKELS: There are many BU Jefferson rolls being offered at lower prices again this week. The only strength seems to be in wartime rolls, which were active at current levels. There are rolls of Buffalo nickels being offered near current levels, but the buyers, who outnumber sellers, also stress quality.

DIMES: There were a few scattered "plus" signs, but for the most part, Roosevelt dimes remained active at current levels. Mercury dimes seem to be wanted in non-picked over rolls. (Strictly original).

QUARTERS: Like Roosevelt dimes, Washington quarters (silver issues) are still very active at current levels. There is one dealer still actively seeking, strictly graded, MS-65 quarters between 1932-1943.

HALVES: All BU Franklin half rolls are in demand. Most are wanted at current levels. Original BU rolls of Walking Liberty halves are still being sought at current levels, with a few dealers requesting large quantities.

The 1982-P "no initial" half has been offered at $70 per roll, with seemingly, no interest.

DOLLARS: There is very little buying pressure in the Ike dollar market. There are a few more "minus" signs this week.

As stated in "The Market in Depth" section, original Morgan dollar rolls are still on "want lists". It appears that large quantities could be absorbed immediately.

PROOF SETS AND MINT SETS: Proof sets from 1950 to 1953 are still wanted by one major buyer, who says, that he will take all comers. Proof sets from 1968 to date are all under selling pressure with very few buyers.

COMMEMORATIVES: There are several dealers trying to locate MS-63 to MS-65 commemoratives, but are reluctant to arbitrarily raise bids.

TYPE: Type coins are also being sought at current levels. Dealers are again reluctant to raise bids, feeling that there just is not much out there anyway.

GOLD: This past couple weeks has seen a few lots of MS-65 gold surface on bourse floors. As a result, there has been a minor price adjustment in the MS-65 grade.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue ara figured on a basis of gold at $371.75 per ounce.

THE COIN DEALER NEWSLETTER

Reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$25.00 per column inch. 2 column inches maximum

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (UNCIRCULATED) Strictly uncirculated—showing no evidence rubbing or friction. However no further qualifications are necessary. It will be bag marked and/or weakly struck, may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63—but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63--but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

MS-65 COMMEMORATIVES AND TYPE ON MAJORITY OF WANT LISTS

Gold and Silver Weakening; Apparently Having no Effect on Rare Coin Market

The Market in Depth

The Olympic Committees have already received over $10,000,000 from surcharges on the sales of the 1983 and 1984 Olympic coins. By an act of Congress there has been 2,000,000 ten dollar gold pieces authorized and 50,000,000 silver dollars. The following prices have recently been monitored:

	Proof	BU
1984 $10 Gold	$330.00	$319.00
1983 Silver Dollar	$ 30.50	$ 27.00
1984 Silver Dollar	$ 30.50	$ 27.00
Three Coin Proof Set	$390.00	$ —

The BU silver dollars are also available by the roll, as follows:

	BID	ASK
1983 & 84-P	$480.00	$520.00
1983 & 84-D	$520.00	$560.00
1983 & 84-S	$520.00	$540.00

There were as many as 550,000 1983 P,D,S sets minted. In 1984, only 500,000 sets were minted. These collector sets are trading at $85 each.

All of the above coins are legal tender. They are also the first-ever Olympic Commemorative coins issued by a United States Mint. The ten dollar gold piece is the first U.S. gold coin minted since 1933. It also marks the first time the "w" (West Point) mintmark has appeared on a U.S. gold coin.

Recently, many generalized comments have been made concerning the "type" market. True, this market appears inactive on the surface. But, when one checks dealer want lists, it is apparent, that most dealers are searching for quality type coins. The market is quite active, but true MS-65 type coins are not that readily available. The holders of this material are not willing to sell at current prices. The buyers are reluctant to raise bids, feeling that, not much new material will surface anyway.

We are dealing with "the numbers and evaporation theory". That is, the number of dealers, investors, and collectors has greatly increased over the last ten years. While, the amount of quality type coins per buyer has spread so thin that they appear to have evaporated.

When nice type coins appear on bourse floors at current levels, buyer and seller quickly get together. This market's appearance is quite misleading, for there are many more buyers than there are sellers.

Commemorative half dollars are another market which is quite active at current levels. More and more dealers are attempting to purchase true MS-65 commemoratives for their inventories. The numbers of available MS-65 coins is far from actual mintages. The quality of strike on each issue is a study in itself and is discussed in various books.

This Week's Market

CENTS: All of the proof only rolls (1975-1983) showed weakness this week. There are still 'minus' signs appearing on various rolls with no buyers in sight.

The 1983-P Lincoln cent with the reverse double die shows buyers at: AU - $115; Ch BU - $125; Gem BU - $150.

NICKELS: A few wartime nickel rolls are still wanted at higher levels with the balance active at current levels. Some later date proof rolls are showing signs of weakness.

DIMES: Silver Roosevelt dime rolls are still active at current levels except for 1948-P, 1963-P, D, and 1964-P, D on which prices slipped. The Roosevelt dime roll set in BU increased to $8700. (1946-1964).

QUARTERS: The Washington quarter BU roll set increased this past week to $19,000. (1941-1964). There are still various buyers for MS-63 and MS-65 singles from 1932 to 1940.

HALVES: There are a few "pluses" in the Franklin series, but on the whole they are active at current levels. The Kennedy roll set (1964-1983) has shown weakness and is now bid at $2825. BU Walker rolls have a strong demand at current levels.

DOLLARS: Morgan and Peace silver dollars are now all bid at least $200 in MS-65, with the addition of the 1922 and 23-P. Many dealers are looking for original bag deals at prices well above rolls. A few rolls are bid at higher levels this week in attempts to satisfy strong customer demand.

PROOF SETS and MINT SETS: Some 1970 (P dime) proof sets have been offered at a lower level with no takers.

Most early mint sets are now being sought at current levels. There are buyers for the 1970 mint set on a large quantity basis. Prices are increasing slowly.

COMMEMORATIVES: There are numerous "plus" signs on MS-65 commemoratives this week. The realization has set in. Most commemoratives have very low mintages compared to other collectable coins. Aside from the usual, well-versed, always present, commemorative dealers, there is "new blood" in the market. As is the case in other issues, strict grading is a must.

TYPE: This area is quite active at current levels. It is difficult to monitor prices because some dealers do not want it known that they will pay over "bid" or "ask".

GOLD: A few more "minus" signs have appeared again this week in MS-65. Twenty dollar Saint Gaudens have increased again in AU and MS-60.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $369.25 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 Very Attractive Strongly uncirculated, showing no evidence of rubbing or handling. However, poor luster or poor quality strike are considered, as are bag marks and/or weak strike may not have full luster.

MS-63 CHOICE UNCIRCULATED! Will have minor bag marks may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same charecteristics as the MS-65---but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck ---and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63---but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

ORIGINAL DOLLAR ROLLS STILL BEING HUNTED

Gold and Silver Holding its Own This Week

The Market in Depth

Gold and silver have been making a eoneerted effort to reaeh an unknown bottom. Day after day speeulators wonder, "is today the low point? Do I buy now?" There is a low point, but, that point is an unknown. What do we know? Rare coins do have a future.

For the past several years, the rare coin market has been directly related to the priee of gold and silver. This relationship has made various dealers what they are today. Some dealers are no longer in business. Others, (tne fortunate ones) realized that someday the rare eoin business would flourish on its own. It would be careless to ignore the fact that, gold and silver inereases do promote numismaties. On the other hand, deereases do not hamper this business as in the past. The rare eoin market is quite eapable of its own ups and downs exclusive of gold and silver. To illustrate this faet, the following chart will be helpful:

	June 15, 1979	Sept. 19, 1980
	* G $279.50 - S $8.40	G $665.00 - S $19.45
1939-S W.L. 50¢ MS-65	$ 235.00	$ 675.00

	$74,963.00	$80,443.00	$96,165.00

*G - Gold, S - Silver

From June 15, 1979, to May 13, 1983, one can see the relative priee changes as they followed the 'ups' and 'downs' of gold and silver. According to these figures, the current index would rank fourth if measured by the priee of gold and silver; aetually fifth if only looking at silver. But, when measuring the total index of rare coins used, the June 29, 1984 index ranks seeond only to the much higher prices of gold and silver in September, 1980. Please note: We attempted to stay away from using extreme highs or lows. According to the ehart gold fell 16.3% and silver 35.2%. But our total price index increased 19.5% from May, 1983 to June 1984. The trend is apparent. Gold and silver may be a good investment in the long run, but, rare eoins will eontinue to inerease, if properly graded, at a much higher rate.

Do not think it's all that easy. One must still study the market to determine whieh issues are currently overprieed and may show a deerease in the future. All issues do not eontinuously go up.

	Sept. 19, 1980	June 29, 1984
Ike Dollar Roll Set	$ 7,900.00	$ 3,000.00
Franklin Half Roll Set	$25,000.00	$16,500.00
Walking Liberty Half Roll Set (41-47)	$65,000.00	$49,300.00
Washington Quarter Roll Set (41-64)	$30,000.00	$19,000.00
Roosevelt Dime Roll Set (46-64)	$12,500.00	$ 8,700.00
Mereury Dime Roll Set (41-45)	$21,500.00	$10,500.00
Jefferson Nickel Roll Set (38-64)	$14,000.00	$ 6,000.00
Buffalo Nickel Roll Set (34-38)	$33,000.00	$20,500.00
Lineoln Cent Roll Set (34-58)	$ 8,750.00	$ 5,150.00

As one ean see, major price ehanges can oeeur. And, they are not always to the upside. So, it is neeessary to study priees on a weekly basis. Determine whieh issues are ripe for higher profits. Then attempt to buy properly graded eoins for a fair priee.

This Week's Market

CENTS: This week produeed a number of 'minus' signs again on BU Lineoln eent rolls; mostly after 1961. Most of the proof only issues from 1975 to 1983 dropped again. Lincoln cent BU single and roll sets are weaker.

NICKELS: BU war niekel roll sets increased as did a few of the individual rolls. This series is still extremely aetive. Some of the late date proof rolls have decreased.

DIMES: Mercury dime BU (34-45) single and roll sets have deereased as there is very little buyer interest at this time. The Roosevelt dime rolls (46-64) are still very popular at eurrent levels with only a eouple rolls higher. Only a couple late date rolls are lower.

QUARTERS: Single BU Washington sets (1932-64) were lower, while the roll set (1941-64) was higher. There were many BU rolls higher this week as the silver issues are still advaneing under strong buying pressure.

HALVES: Walking Liberty halves remained stable at eurrent levels, while Franklin rolls are still moving higher. Only one roll (1951-D) was lower, showing that this series is extremely popular. BU elad rolls were mixed as a few rolls retreated.

DOLLARS: A few better date dollars were lower this week in less than MS-60 grades. Morgans in XF were stronger early in the week at $17, but fell baek to $16.50 by midweek and appeared to weaken baek to eurrent levels. Many BU dollar rolls advaneed again with the minimum bid on Morgans (1878-1904) now at $870 per roll. Original rolls are extremely difficult to locate and quite easy to sell. Blue and Brown Ikes are having trouble maintaining bids as a few were lower again.

PROOF SETS and MINT SETS: Most proof sets remained aetive at eurrent bids exeept for 1954 and 1955, whieh were lower. A few mint sets were weaker while the others remained stable and quite aetive at these levels.

COMMEMORATIVES: There are still many buyers of MS-65 commemoratives at eurrent levels. The number of buyers appears to increase weekly.

TYPE: Proof-65 Morgan dollars increased while other issues have been aetive at these levels. As has been stated many times, availability is very low for gem material.

GOLD: MS-63 U.S. gold is on various want lists at this time and eould be at bargain priees. Many AU's are also on the rise. Twenty dollar St. Gaudens and Liberties have inereased in AU and MS-60.

U.S. GOLD (Prices are for the most common date of each type.) Bullion releted gold coins in this issue are figured on a besis of gold at $370.70 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$25.00 per column inch, 2 column inches maximum

Advertising space is limited, ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather than "gem"
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (UNCIRCULATED) Strictly uncirculated, showing no evidence rubbing or friction. However, no further qualifications are necessary. It will be bag marked and/or weakly struck, may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63, but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63--but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets use prices for individual issues as listed in the Monthly Summary

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

GOLD AND SILVER TUMBLE; WHERE'S THE BOTTOM?

MS-63 Coins on Many Want Lists

The Market in Depth

Now that gold and silver have reached this year's low, where do we go from here? There seems to be no base at this point. The speculators, who believed this market could not go lower, are being sold out of their contracts if they cannot come up with margin money. It is a very dangerous 'time' for speculators. If one goes 'short' and the market turns upward, the losses can be even more disastrous. Investor's note: Carefully check current markets before buying or selling, since price fluctuations are occurring so rapidly.

With this sudden down surge in the metals market, we again question the strength of the rare coin market. Overall, MS-65 coins seem to still hold their own. There are still many want lists for commemoratives, dollars, walking liberty halves, and type. If gold and silver continue downward, it would be a good idea to again check prices on a daily basis, even on MS-65 coins.

There appears to be more sellers than buyers of off-quality material. (Off-quality refers to coins which are pushed at a higher grade.) This weakness is also apparent in modern sets and singles, where 'minus' signs show up on a consistent basis.

One area of the market which is quite active is MS-63 gold, silver dollars, walking liberty halves, and type. If properly graded, these coins will sell quickly to dealer's want lists. These serie's have been very active, as many dealers feel they are underpriced. It is easier to sell investors MS-63 material while it is priced so far under MS-65.

Recently, the rare coin industry received a shot in the arm, when it was announced that, the capital gains holding period has been changed from one year to six months. This will enable the industry to compete with other investment markets. This holding period will return to one year after 1987. It is suggested that individuals check with their own CPA to determine tax advantages. The Industry Council for Tangible Assets puts forth major efforts to fight legislation against our industry and this was a victory which may need be fought again in the near future.

This Week's Market

CENTS: The 'minus' signs appear to be slowing down on BU Lincoln rolls. Dealers have cut back their efforts to "blow off" BU rolls at discounted prices. There are more buyers and sellers of the 1983-P Lincoln cent with the reverse double die. Possibly its popularity is widening. This week's price indicators:

GRADE	BID	ASK
XF	$ 90	$ 135
AU	115	150
BU	135	175
Ch. BU	160	210

NICKELS: BU war nickel rolls finally took a breather. Only the 1944-D rolls increased, while the other rolls remained active at current bid levels.

DIMES: BU Roosevelt dime rolls are still being sought at current bids, except, 1948-P (which is lower at $350) and 1962-P, D thru 1964-P, D which fell as a direct result of the silver market.

QUARTERS: Again, the silver market hurt 1962-P, D thru 1964-P, D BU Washington quarter rolls. Otherwise, there were various 'plus' signs as there is still considerable strength in the 1941-61 issues. The 1934-P to 1937-P rolls did suffer a small set-back.

HALVES: BU Franklin half rolls are still active at current levels. While, Kennedy rolls showed some weakening, along with sets (1964-1983).

DOLLARS: There are a few original dollar rolls up this week. Remember: The BU dollar roll section on page five indicates original rolls only. Put together rolls are a completely different price and usually trade around MS-60 money. The dealers who bid on dollar rolls at this time, emphasize, original.

Ike dollars do not show any improvement. Each week brings cheaper prices.

Silver declining so rapidly has finally taken its toll on graded circ. dollars. Many dates and grades have dropped as many dealers try to reduce inventory.

PROOF SETS and MINT SETS: The 1961-1963 silver proof sets are now showing considerable weakness. The fall off of silver prices has apparently hurt this market as many buyers have backed off of current bids. The 1954 and 1955 proof sets have also decreased this week.

All the special mint sets (1965-67) were lower this week, as selling has plagued this series.

COMMEMORATIVES: There are various 'plus' signs on MS-65 commemoratives. This market is gathering steam as we head toward ANA. There are only a couple dates lower in MS-60 and MS-63. Gold commemoratives are generally weaker in MS-65, as about half of the dates are down.

TYPE: Major action in type this week has been a few major dealers attempting to sell MS-60 to MS-65 material. Confirmation of sales may result in future changes. Otherwise, this area of the market has remained stable at current prices.

GOLD: As one may guess, gold faltering, has resulted in U.S. coins dropping in price. Many changes have occurred and some may still adjust depending upon where we go from here.

U.S. GOLD. (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $348.00 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (UNCIRCULATED) Struck, uncirculated showing no evidence rubbing or friction. However, further qualifications are necessary. It may be bag marked and/or weakly struck, may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same charecteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --end virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 -but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

WANT LISTS INCREASING IN ANTICIPATION OF A.N.A.

Gold and Silver Still Quite Volatile

The Market in Depth

On July 27, 1984, the A.N.A. begins in Detroit, Michigan. The fever of this show (it is normally the largest of the year) will be high if: Attendance is good, by both dealers and collectors - investors; and dealers come armed with want lists and money.

People travel far and wide to experience the A.N.A. This will be the best time of the year to sell unwanted material. Also, it will be the best time to buy coins for want lists. Dealers bring out their best material for this large audience. So, it's time to prepare your want lists, know what you want to pay for the material, and most importantly, proper grading is a must.

The A.N.A. auction will be quite large and well attended. If planned in advance, auctions are a good method of disposing of coins. They receive a maximum exposure in a very competitive scene. On the opposite side, auctions are a very good source from which to buy material. Unless of course, there are many bidders on one particular lot, then your chances of buying that coin at your price are greatly diminished. For the dealers that work auctions diligently, there are always bargains to be found.

Dropping gold prices have caused negative results on U.S. gold this past week. Many of the issues from VF thru MS-60 have fallen amidst uncertain gold prices.

There is a lot of activity this week in two areas; MS-65 commemoratives and Morgan dollars. These areas are expected to be very active during the next few weeks, (Auctions and the A.N.A.) as many dealers are looking to beef up their inventories or, at the very least, satisfy want lists. Dealers are attempting to purchase MS-65 dollars at current levels, without getting into bidding wars. The most active dollars appear to be in the $200 to $700 range.

There are many issues in MS-65 silver commemoratives which are appearing on many want lists. The most active are sets which bid $700 and less, and singles which bid $500 and less. Dealers are preparing for the A.N.A. by accumulating as many MS-65 pieces as possible. Many commems are at, or near, their recent lows and many dealers (collectors-investors) realize there may be room for improvement. This next month should be a good indicator of where commems can go.

This Week's Market

CENTS: There were only a few minor changes in BU Lincoln rolls. Lincoln sets (34-58) retreated just a bit. The only prices monitored for the 1983-P reverse double die was: AU $115/$135 and BU $160/$185.

NICKELS: BU Jefferson nickel rolls were a little quiet, except for the 1944-D wartime roll, which showed a minor gain. BU Jefferson sets (38-64) seem to have settled at current levels.

DIMES: There is one bidder looking for an "MS-65+ Full Split Band" 1945-P Mercury dime at $1750, while other bidders, remain at $1500 for MS-65 FSB coins. The 1948-P BU roll dropped a healthy $40 as bid fell to $310. The silver related rolls, 1961-P, D and 1962-P, D fell along with silver.

There were a few BU Mercury dime rolls offered at ask levels.

QUARTERS: There was not as much activity this past week in BU rolls of Washington quarters. There appeared to be more sellers than buyers although, sellers are holding out for "ask" prices.

HALVES: There were a very few "minus" signs for BU Franklin rolls as buyers appear to be waiting for their inventories to find new homes. There has been an awful lot of rolls purchased recently that have been confirmed as sold, but need to be delivered before the buyers can resume adding to their inventories.

DOLLARS: Original BU dollar rolls are still active although, 1885-P is the only roll that increased. MS-65 dollars are still being sought as dealers try to add to inventories before A.N.A.

Ike dollars are still seeking lower levels as they keep getting weaker and weaker. Almost all of the "Blue" and "Brown" Ike dollars were lower this week.

PROOF SETS and MINT SETS: Most of the silver-related proof sets (1957-63) were lower as buyers wait for silver to adjust. A few of the late date proof sets also registered losses. Bid-ask prices begin to settle down on 1984 proof sets: $15/$16. Many silver-related mint sets turned downward as sellers reduce volatile inventory.

COMMEMORATIVES: Several MS-65 commemoratives registered gains as buyers attempt to pry loose some gem coins. Please see page two for changes.

TYPE: The next few weeks should be a good indicator of this market. With two major shows and three major auctions around the corner, we will soon find out how "hot" type coins are. Most dealers are waiting until A.N.A. to offer their gem type coins.

GOLD: Some U.S. gold coin premiums adjusted downward; as gold increased, prices were lower on coins. Check page one for changes.

U.S. GOLD. (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $349.25 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

Mint State. A coin which is free of all signs of wear. However, it may have contact marks, hairlines, or other slight blemishes resulting from its production or post-production handling. Unless additional qualifications are mentioned, Mint State coins may be carelessly struck, may not have sharp detail, and may have slight discoloration.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides

THE UNCERTAINTY OF GOLD AND SILVER STILL PLAGUES THE MARKET

Most Dealers Very Apprehensive as A.N.A. Begins

The Market in Depth

For the first time in many years, it appears to be a buyer's market as we head into the A.N.A. show in Detroit, Michigan. That is, there are expected to be more sellers than buyers at this major convention. The unstable price of gold and silver has made for a nervous market. Dealers are concerned with the fact, that, their inventories' value is decreasing, while they have no control over this occurrence.

Many dealers feel tentative as the A.N.A. approaches. They have want lists, but their grading will be strict. The auctions will provide quite a bit of new material, but it's anyones guess as to price levels. If activity begins briskly, it could carry over day to day.

There have been many discussions recently on proof coins. The handling of proof coinage, in and out of the mints, has improved over the last two decades. Thus, quality has improved. Education of the collector will enable him to preserve that quality in the years to come. But, what of the earlier proof coins? How have the proofs before 1964 been handled?----Most importantly----preserved?

The cellophane holders were weak and over the years air has permeated the packages. Handling at the mints was not as refined as it is today, and quality was not consistent. Therefore, the number of MS-65 coins available, figures to be a very small percentage. Staple scratches, improper cleaning, die polishing marks, spotting, improper storage, lint marks, nicks in the dies, weak strike, fingerprints, and erasuring all help to decrease the potential MS-65 quality of these earlier proof coins. As prices have increased on earlier proof sets, grading has also become stricter and buyers tend to use a magnifying glass more often. Under magnification, more of the aforementioned problems will show up which were not seen with the naked eye.

It is difficult to arrive at actual numbers of potential MS-65 coins in a proof set, nonetheless, given 100 fresh 1941 proof sets, one should find approximately 5 cents, 10 nickels, 50 dimes, 20 quarters, and 35-40 halves. Another reason for the low number of MS-65 coins pertains to handling. The earlier proof sets did not cost very much so they were thrown in drawers, jewelry boxes, and sometimes taken out of the original packaging and placed in tissue paper. Thus, many coins show visible hairlines.

Each year brings better quality. Although each year still suffers from its own idiosyncrasies. More time and study will result in a future article in the monthly summary by date.

This Week's Market

CENTS: The 1936-P BU Lincoln roll showed the only increase this week. There were a handful of decreases on BU rolls as activity still remains slack. A few proof rolls also declined.

Most recent bids on 1983-P reverse double die were: AU - $120; Ch. BU - $175; and Gem BU - $225.

NICKELS: BU Jefferson nickel rolls revealed "plus" signs on 1944-D and 1944-S. Quite a few of the late date rolls were lower as trading was very light.

The 1936-S BU Buffalo roll was bid at a lower $1350.

DIMES: There was very little activity this past week in BU Roosevelt rolls, although some were a little lower. Some of the later silver issues followed the lead of silver bullion.

QUARTERS: As with Roosevelt dimes, the late silver Washington BU quarter rolls were lower.

The early MS-65 quarters remain fairly active at current levels except for 1935-S, 1936-S, and 1937-S which were lower.

HALVES: The 1955-P BU roll was higher as buyers are still looking for this date. There were various BU Franklin rolls down as sellers outnumber buyers. Most of the BU clad rolls were also lower. Many of the late-date rolls were lower, including some proof rolls.

DOLLARS: Activity on Ikes still pops up now and then, but the prices aren't---up. More "minus" signs this week proves Ikes can go down further.

Original BU dollar rolls are still active at current levels, although, there has not been as much offered lately.

PROOF SETS and MINT SETS: The silver related proof sets (60-63) have once again decreased. The big buyers of these sets have apparently gone on vacation. Various late-date proof sets have also shown weakness. Bid-ask remains the same for 1984 proof sets; $15/$16.

There were a few price increases on mint sets (74, 76, 77, and 79) but, for the most part, the changes were lower this week.

COMMEMORATIVES: There are more dealers joining the ranks already looking for MS-65 commemoratives. Although, each dealer's criteria may be a little different, it all adds up to gem quality. One may look for rainbow hues, while another looks for a coin with a minute number of marks, and still another may look for as strong a strike as is possible. Among this week's price increases were:

MS-65	New Bid
Alabama 2x2	$ 1500.00
Alabama	1200.00
35 Ark Set	550.00
36 Ark Set	540.00
California Jubilee	450.00
Connecticut	530.00
Long Island	200.00
Missouri 2x4	1800.00
Oregon	225.00
'21 Pilgrim	475.00

Please check page two for all changes.

There were a few changes in commem gold----lower.

TYPE: This area indicates much weakness in MS-65 material. There are numerous "minus" signs on page six. The A.N.A. should reveal how weak this market really is.

GOLD: U.S. gold coins are definitely having trouble maintaining bids, as bids follow the price of bullion. A few MS-65 coins have lower bids this week.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $339.75 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$25.00 per column inch. 2 column inches maximum

Advertising space is limited; eds will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (UNCIRCULATED) Any coin that is completely uncirculated showing no evidence of rubbing or friction. However, no further qualifications are necessary. It will have bag marks and/or weakly struck; may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same chereteristics as the MS-63 -but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65---but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck ---and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 --but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

ACTIVITY STRENGTHENS IN SOME AREAS AT A.N.A.

Attendance is Substantial - Coins Plentiful

The Market in Depth

As we go to press, the A.N.A. in Detroit, has seen four days of moderately heavy activity. Attendance has been very good and the dealers, who came to work, have stayed quite active. For the most part, prices seem steady in some areas and a little higher in others (MS-65 commemoratives specificially). Although bullion prices are mixed, further adjustments are occurring on U.S. gold in XF to MS-60.

Dealers and investors alike, realize, that if there is a change in the presidency, there will be a major inflationary effect on the economy. And if there is no change, inflation can only be held down for so long. In either case, current prices have to be awfully inviting at this time. In late date material alone, where there was very little interest the past few months, (Ike dollars specifically) there are now bidders attempting to get in on the ground floor.

The overall market appears to be mildly warm, although silver commemoratives and dollars seem to be leading the way at A.N.A. As stated recently, more and more dealers are beginning to get involved with MS-65 commems. At current bids, they are not locating much material, so some dealers are increasing their buy prices. Results of increased bidding can be seen on page two.

Interest is strongest in the area of commemoratives, as a number of fresh deals have been brought out and sold; most were quickly resold. Obviously, there were many buyers who are just beginning to see the tip of the iceberg. The next few months should be interesting as commems try to outperform the rest of the market. Readers must once agian be reminded that bidders demand defect-free MS-65 coins.

Morgan dollars are still difficult to locate in MS-65 condition. In general, prices are firm as most buyers of MS-65 dollars are willing to purchase at current bid/ask levels for true MS-65 coins.

And then there are the usual phenomenal prices for exceptional coins. The following prices were realized in Auction '84:

Date	Denomination	Auction Grade	Price
1886-S	$	MS-67, P/L	$5500
1888-S	$	MS-67, P/L	$2860
1900-S	$	MS-67, P/L	$4290
1921 Peace	$	MS-67	$2695

Other areas of the market also realized some strong prices in Auction '84:

Date	Denomination	Auction Grade	Price
1853/A	10¢	MS-65	$ 4,400
1887	25¢	MS-65	$ 5,280
1888	25¢	MS-65	$ 5,060
1889	25¢	MS-65	$ 5,500
1873	Trade $	MS-65	$ 8,800
1854 TII	Gold $1	MS-65	$15,950
1796/stars	Gold $2½	MS-65	$74,250
1808	Gold $2½	MS-65	$99,000
1927-D	Gold $20	MS-65	$198,000

Obviously, the aforementioned gold coins are seldom seen, let alone in such nice quality. These prices indicate how difficult it is to place an exact price on truly rare coins, until they surface on either bourse or auction floors.

Further pricing of high quality material as seen in Auction '84:

Date	Denomination	Auction Grade	Price
1923-S	5¢	MS-67	$ 6,050
1925-S	5¢	MS-65+	$ 4,620
1926-S	5¢	MS-65+	$ 6,875
1937-D 3-leg	5¢	MS-67	$ 5,280
1796	10¢	MS-67	$37,400
1913-S	25¢	MS-67	$ 9,900
1916-D	50¢	MS-65+	$ 2,970
1794	$	MS-60+	$93,500
1802/1	Gold $5	MS-65+	$27,500
1815	Gold $5	58/60	$79,750

The August Monthly Summary will detail auction results and what they mean to this current market.

This Week's Market

CENTS: There are still bargain hunters looking to buy BU Lincoln rolls. Their buys are well back of bid, but there are apparently no sellers at these prices.

NICKELS: BU Jefferson rolls indicate relatively no activity for this past week with the exception of the 1944-D war nickel rolls. It showed an increase in bid.

DIMES: BU Roosevelt dime rolls (46-63) are once again getting some attention at current levels. As was mentioned in this week's market a couple weeks ago, some dealers were expecting to sell pre-confimred rolls of this issue. They have sold and now the buying begins again.

QUARTERS: BU Washington quarters rolls (41-63) are again getting attention for the same reason as Roosevelt dimes. Standing Liberty quarters are firm at current bids with some new activity at A.N.A.

HALVES: BU Franklin rolls (48-63), are receiving offers to buy at current bids. After slowing down the last couple of weeks, bidders are again stocking up on this series.

DOLLARS: Original dollar rolls have fallen as some rolls have been offered at lower prices and there has been apparently no takers. See page five for new prices. There have been some price adjustments in MS-60 dollars on page four.

PROOF SETS and MINT SETS: Proof sets appear to be firming up as there was not much offered this past week.

This past week showed an increase in 1953-58 mint sets (original only). The rest of the mint sets appear firm at current levels. There is some bargain hunting attempts being made, with no apparent results.

COMMEMORATIVES: As stated in The Market in Depth section, this is the strongest area of the market at this time. There is a lot of activity at current levels and when these prices are unsuccessful, bids are being increased. See page two for new bids.

TYPE: Some of the more common BU MS-65 type coins were very plentiful at A.N.A. As a result, there have been some price adjustments. Refer to page six.

GOLD: MS-65 $20 St. Gaudens increased this week as bidders try to locate pieces for investors. Also, showing a higher bid is MS-65 TII one dollar gold. This is a very elusive coin in gem BU.

There were a very few "minus" signs in U.S. gold (XF - MS-60) as there are a number of large lots available.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $342.25 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (UNCIRCULATED) Strictly uncirculated, showing no evidence rubbing or friction. However, no further qualifications are necessary. It will be bag marked and/or weakly struck, may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63—but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same chereteristics as the MS-65—but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck —and virtuelly perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They renge from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chert are for "typical" coins. These usually average MS-63 -but may also include MS-65 exemples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

MS-65 COMMEMORATIVES AND DOLLARS REMAIN STRENGTH OF THE MARKET

Type Active; But, at Lower Prices

The Market in Depth

Now that the 1984 American Numismatic Association Convention has concluded in Detroit, reactions range from, those dealers who were very happy with business and did more than expected, to those that were very disappointed by their efforts and sales. This is an extremely difficult market to get a handle on, to which many dealers will attest. Some dealers who felt disappointment, realized their material is not that which is most popular at this time. And even substantial discounts did not create sales. On the positive side, there were various "wonder coins", which produced tremendous prices, as was reported last week in The Market in Depth.

Type coins were very active although some were traded at lower levels. It appears that most dealers are in the bargain hunting mood as interest increases. Far-thinking buyers are attempting to build onto inventories while prices remain at a lower level. There are very few dealers willing to sell to the current bidders.

Silver dollars remain strong---that is MS-65's. They have been on some dealer's want lists, continuously; these coins, strictly graded, are truly elusive. A large percentage of silver dollars are close, but they are actually MS-63's or MS-64's. It is extremely unlikely that there could be any large hoards of MS-65 dollars available in the future. If there are any Redfield hoards out there, the contents would quickly be absorbed into the marketplace and put away.

As was stated many times recently, MS-65 silver commemoratives are very active at current bids. Many dealers join the "buying ranks" almost on a daily basis. This series is gathering momentum and it's anybody's guess as to where they will end up.

There are a number of MS-65 commems up this week as bidders try to pry loose even a few coins for their inventories. There also was quite a hit of activity at the A.N.A. in lesser grades. This activity is somewhat reflected in bid adjustments on page two.

This Week's Market

CENTS: Trading among BU Lincoln rolls remains sporadic at best. However, buying lists are beginning to appear. Bids are still at bargain hunting levels and sellers are not yet attracted. Most transactions at lower levels are for spotted or otherwise, inferior rolls. There are occasional requests for original late-date bags, but only at current levels and usually, just for one or two bags. One bidder is attempting to buy early circulated (1909-1930) rolls but, his less-than bids are not meeting with much success.

NICKELS: BU War nickel rolls are steady at current levels. The other Jefferson rolls reflect very light trading. BU Buffalo rolls remain somewhat quiet, as the whole nickel series lacks luster.

DIMES: BU Roosevelt dime rolls (1946-64) are trading at current levels, with the exception of 1948-P, D and 1949-S which eased off slightly. With all the advances made recently, bidders appear to be satisifed with the current levels.

"Common date" BU Mercury dime rolls (1940-P thru 1945-P) showed a slight weakness this past week. Recent buyers have either disappeared or lowered their buy prices. Sellers have apparently decided to build up their cash position, rather than wait in anticipation of a hot market.

QUARTERS: BU Washington quarter rolls (1941-64) remain active at current levels. Bidders are attempting to solidify their positions without raising bids any further. Early BU rolls (1935-P, 36-P, 37-P, and 39-P) were lower this week as interest is in the later issues. The 1936-D MS-65 has showed a slight weakness.

HALVES: BU Franklin rolls are steady except the 1951-D, 1962-D and 1963-P & D which were lower. The other rolls remain on want lists, as buyers attempt to keep bids stable.

There is renewed interest in BU W.L. rolls, but most of it is in the bargain hunting stage. The one exception is with the 1946-D roll which has been offered at lower levels. Most buyers of W.L. rolls hope to pull, at least, a couple MS-65 coins out of the roll.

DOLLARS: As stated earlier, MS-65 dollars are still active at current levels. Most dealers still feel that increased bidding will not increase buys.

MS-60 1882-CC, 83-CC, 84-CC dollars showed weakness recently. There were a few more price adjustments in BU dollar rolls this week. Please check page five.

Although there are more "minus" signs than "plus" signs on Ike dollars, it stills appears they are beginning to firm up. This remains to be seen in the next few weeks. The 1979-S TII "susie" was lower this week.

PROOF SETS and MINT SETS: There has been a lot of profit-taking the last couple weeks in proof sets. Early sets, 1936, 1938, 1940, 1941, and 1942 all have "minus" signs this week. Dealers are willing to part with sets in order to create new interest in this series. The 1950, 1953, and 1959 proof sets have shown recent weakness as bids are lowered.

The early mint sets 1948-58 are still being sought at current levels. Many dealers realize it is difficult to find these sets that have not been tampered with. The 1965, 66, 67, and 71 mint sets are lower this week.

COMMEMORATIVES: The following appear to be the most active commems; with new bids.

MS-65	Current Bid
Isabella Quarter	$1750.00
Alabama 2x2	$1600.00
Alabama	$1300.00
Bay Bridge	$ 240.00
Cincinnati - PDS set	$1500.00
Connecticut	$ 550.00
Grant	$ 400.00
Missouri 2x4	$2000.00
Missouri	$1900.00

Remember: Strict grading is of the utmost importance.

There were a few MS-65 gold commems offered around the bid level and tney were quickly snapped up.

TYPE: There are quite a few "minus" signs appearing throughout MS-65 BU and Proof Type. Most dealers are being cautious as they lower their buy prices. Although some dealers have offered coins at lower prices, it must be stressed that type is very active and sought after. The most significant changes occurred with BU-65 Two-cent pieces, Three-cent silver TIII, and Barber quarters. In Proof-65 the changes occurred with Indian Head cents, Two-cent pieces, Three-cent nickels, Shield nickels, and Buffalo nickels. It is necessary to point out that these decreases are for the most common dates.

GOLD: Although gold increased this past week, there were quite a few adjustments to the downside. Some dealers are taking profits on MS-65 gold as they lower their sell prices. Selling prices are lower on some series from VF to MS-60. Premiums have been lowered as some large losts are being offered at reduced prices.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $349.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$25.00 per column inch, 2 column inches maximum

Advertising space is limited, ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem"
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

[illegible] AT [illegible] y are required showing little evidence rubbing or friction. However no further qualifications are necessary. [illegible] will be bag marked and/or weakly struck may not have [illegible] luster.

MS 63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS 65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS 65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS 63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS 63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

The Market in Depth

With the recent increased activity on MS-65 silver commemoratives, it appears appropriate to review the last four years' highs and lows. In order to keep a proper perspective, it was necessary to select specific time periods which encompassed the majority of the highs and lows. In a couple cases, the figures shown may not be the exact high or low of an individual issue, although these time periods should represent the two extremes.

This is the first of two parts, with the second half to appear next week.

This Week's Market

CENTS: BU Lincoln rolls appear to be firming up. There has been an absence of sellers at "below bid" prices. The 1936-P BU roll increased to $50 bid. Some of the late-date proof rolls have slipped lower. The 1983 DD cent was monitored at $130 ask for ten uncirculated coins.

NICKELS: One dealer has been bidding on original BU rolls of 1935-S Buffalo nickels; to no avail. Thus, he has changed his bids to read, "they don't have to be original can be put-together, but must be BU". There are some strong attempts to purchase BU rolls of 1954-S nickels. There are bag quantities needed. BU war nickel rolls are relatively stable at current bids, with the 1943-S and 1944-D wanted in quantity.

DIMES: BU Mercury dime rolls are again showing some weakness in various dates, such as, 1935-P, 41-S, 43-D, and 45-D, S. Bid buyers can still be found on BU Roosevelt dime rolls with the exception of the 1949-P, which is lower this week. Some late-date proof rolls are lower this week.

QUARTERS: With the exception of the 1943-S BU Washington quarter roll, the silver issues from 1941-1964 are still active as dealers are seeking to keep up with their customers' needs.

HALVES: There are a few minor changes concerning BU Franklin halves. They are 1948-P, D and 1963-P, D. There were a few rolls wanted in large quantities: 1957-P, 1960-P, 1961-P, D. Gem BU Walking Liberty halves increased bid to $185.

DOLLARS: There are numerous bidders for XF Morgan dollars at $16.25 to $16.75 each. They will take large quantities. BU 1882, 83, 84-CC dollars are up this week after dropping last week. This market continues to bounce back and forth. BU dollar rolls are down (common Morgans - $800, Peace - $660) but, are quite firm at the new levels.

PROOF SETS and MINT SETS: Early proof sets showed some dates lower this week. This seems to follow as proof Walking Liberty halves have dropped recently. The 1951 and 1952 proof sets are lower. The 1979-S TII and 1981-S TII were both weaker as dealer interest softens. The 1984 proof sets were available and traded at A.N.A. for $13/$14. But, dealers complain that they are not that easily available in consistent quantities.

The more common (1962-4) mint sets were lower as dealers drop sell prices.

COMMEMORATIVES: It will be necessary to check page two for all the changes this week as over one-third of the issues advanced. A couple notable transactions were completed for a Ft. Vancouver ($850) and a Missouri ($2250). Both were nice MS-65 coins.

TYPE: Bidders appear content at current MS-65 levels. Sellers are still reluctant to offer legitimately graded MS-65 coins at these levels, thus, creating a difficult area in which to derive bids.

GOLD: Bid prices have increased on MS-65 St. Gaudens as a few dealers try to buy this particular coin. Some dealers request ANACS graded coins and are willing to pay up to $2000, although they are only looking for a few coins.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $351.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES
$25.00 per column inch, 2 column inches maximum

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices

MS-60 (UNCIRCULATED) Strictly uncirculated showing no evidence rubbing or friction. However no further qualifications are necessary. Will be bag marked and/or weakly struck; may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same chereteristics es the MS-65--but with the additional feeture of deep mirror prooflike surfeces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtuelly perfect in all other respects. Prices of such seldom encountered specimens are besed upon the merits of each coin. They renge from very scerce to unknown according to dete.

Prices for single BU sets end BU roll sets in this chart are for "typical" coins. These usually average MS-63 but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

The Market in Depth

With the completion of the U.S. silver commemorative study this week, one must draw their own conclusions. Over the past four years there have been drastic price changes. In determining which issues to purchase, one must also consider original mintage, availability in MS-65, and resalability (when it's time to take profits).

This Week's Market

CENTS: There have been stronger buys this week for the 1944-D/S cent: VF - $95, XF - $120, AU - $175, MS-60 - $270, MS-63 - $380, and MS-65 - $550. There are a few late rolls just a touch weaker, while the early BU rolls (1934-55) are quite firm. The only exceptions are the 1940-D, 46-D, 49-D, 52-D, and 54-P.

NICKELS: There are active bids, at current levels, for BU Buffalo rolls (1934-P, 35-P, 36-P, S, 37-P, D, S). Rolls must be original. BU Jefferson rolls are appearing on more want lists near current levels. These are 1939-P, 40-P, D, S, 41-P, S, 48-S, 51-P, S, and 54-P, S.

DIMES: There is competitive bidding on the 1958-P BU dime rolls at higher levels. The majority of the Roosevelt dime rolls are stable except the 1948-P, D, S. Most of the common BU Mercury dime rolls are being bid for at current levels, as various dealers look for a few original rolls.

QUARTERS: BU Washington quarter rolls are appearing on a few sell lists as some dealers lower their sell prices.

Two particular rolls, which remain sought after, are the 1958-P and 1955-D rolls.

HALVES: Original BU rolls of Walking Liberty halves are beginning to show encouraging signs. Some rolls are currently being sought at bid/ask levels. In general, BU Franklin rolls have softened slightly, but there are a couple rolls which are needed at higher prices. They are 1955-P, and 1961-P.

DOLLARS: Original BU Morgan dollar rolls have received frequent bids of $800 on common rolls. They are quite firm at these levels as some dealers believe this is a good buying opportunity.

Ike dollars are again receiving a lot of attention, although prices are definitely mixed. Some dealers are offering deals below bids, while other dealers will pay bid on specific coins and over bid on a couple of dates.

PROOF SETS and MINT SETS: As more and more 1984 proof sets are delivered, the availability becomes easier and the price has now pushed downward. There are now sellers at $12.50. The silver proof sets are beginning to show strength again after a month-long slowdown. One will notice "plus" signs on 1956 thru 1960. These prices appear on page five.

Most of the action on mint sets this week falls into the category of bargain hunting. Bids remain the same as sellers are not anxious, at these prices.

COMMEMORATIVES: MS-65 silver commemoratives are still on the most active list, though one might notice that there are fewer "plus" signs this week than last. Most dealers are afraid of "runaway" prices as the availability of gem coins is quite sparse.

TYPE: This area is very steady at this time. There are buyers looking to build up their inventories of strictly graded MS-65 coins at current levels. There are also buyers of strictly graded MS-63 coins.

GOLD: U.S. gold (VF - MS-60) coins appear to have firmed up for the time being. There are various dealers looking for MS-65 gold, but at this time are asking for quotes.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $344.75 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE. the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES
$25.00 per column inch; 2 column inches maximum
Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (UNCIRCULATED) Will have many bag marks, hairlines, scratches or other defects. However, further hairlines are necessary. Will be bag marked and slightly struck, may not have full mint luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

LATE-DATE SILVER PROOF SETS (1956-63) SCORE MAJOR GAINS

Type, Commems, and Prooflike Dollars; All Actively Being Sought

The Market in Depth

Despite some recent softness (generally caused by overall market slowdown---slow summer months and a slight sell-off by a few dealers), Type coins are quite steady if not actually warm. Everyone should be aware by now that the summer months are usually the slowest time of the year, as many dealers and clients take vacations. The show circuit tends to slowdown except for the A.N.A., Boston, and Lanham. And auctions tend to have fewer attendees.

A few dealers have recently sold type coins at lower prices, possibly feeling that prices are somewhat high. More specifically, not that common MS-65 type coins are priced at more than they are worth, rather, they are in a higher price category than bidders and clients want to purchase at this time. Although there are many buyers out there capable of purchasing big ticket items, it seems that the multitudes are sticking with lower priced coins of MS-65 quality.

This may seem contradictory, but legitimately graded MS-60 to MS-65 type coins are quite desirable at current prices. If one were to buy into this market, one might look for coins that meets ones' own individual criteria for the specific grade.

After a few quiet weeks, original Morgan dollar rolls are again somewhat active. There are many dealers attempting to buy at current levels, although a few dealers have advanced their bids, nonetheless, they are only looking for limited quantities of common dates. The next few weeks will indicate whether these prices hold or increase. It will also be interesting to see if any "hard money dealers" begin any new promotions.

The common 1922-P and 23-P Peace dollars are receiving more attention as bid increases slightly. Most dealers specify "original, undipped rolls".

As most dealers know, MS-65 Prooflike Morgan dollars are few and far between. There are many buyers of prooflikes at current levels, as nominal higher prices seem almost useless. Nevertheless, there have been some new higher bids monitored as a few buyers feel it necessary in order to locate even a few pieces.

It may seem that buyers of MS-65 prooflike dollars are quite picky, when in reality, it must be remembered that these coins must exhibit a full strike with only a very few obvious bag marks. These bag marks must be hidden even more than in non-prooflike MS-65's because the deep mirror tends to accentuate bagmarks more readily. In essence, an MS-65 prooflike dollar should be a splendiferous specimen.

This Week's Market

CENTS: Although, generally still showing weakness on the bidding side, sellers are no longer willing to part with BU rolls of Lincolns at less than bid levels. To this norm there are a few exceptions: 1945-P, 46-D, 51-D, 55-D, 56-D, and 57-D.

The 1983 DD Lincoln has been offered at the following prices: AU - $125, BU - $150.

NICKELS: There are bidders for most of the BU Buffalo rolls right at bid levels except for the 1937-D roll which has been offered under bid. Bid has fallen to $900. The Jefferson series appears to be firm at this time. The majority of buys and sells are in the bid range.

DIMES: The only BU Roosevelt dime roll showing any weakness at all is 1952-S, at a new bid of $220. Otherwise, this series in general, has been very active at bid/ask levels. Maybe one indication of the strength here are the roll sets of BU Roosevelt dimes wanted at current bids.

Mercury dimes have seen only scattered action this past week with bids near current levels.

QUARTERS: BU quarter rolls are still wanted at current levels, although 1943-P and 1949-P are a touch weaker. This market still has many active bidders. In late-date rolls the 1982-P is bid higher this week.

HALVES: BU W.L. half dollar rolls are actively being sought at current levels. There is some bargain hunting taking place, but it appears the bid/ask buyers are being filled first.

Although seemingly soft, BU Franklins rolls, whenever offered under bid, are sold immediately. This weakness is apparent with single BU sets, but BU roll sets are strong. This indicates some future planning.

The 1979-S and 81-S type II half dollars are lower this week as dealer interest has stalled.

DOLLARS: Original Peace dollar rolls are gaining interest as bids increase for 1922 and 23-P. As stated in The Market in Depth, MS-65 prooflike dollars are receiving active bids. Please check page five for bid changes.

Ike dollars are showing signs of nearing a bottom as the 1971-S Brown Ike is the only date with a "minus" sign this week. Sellers are just not willing to sell off any substantial positions of this price-decimated series.

PROOF SETS and MINT SETS: The 1956 to 1963 proof sets are still "Red Hot". There are many buyers of these sets as various major dealers run promotions. As a spin off, many other dealers get involved and now everyone's on the "bandwagon".

The 1983 no 'S' proof set has reached $675 bid. The 1984 proof sets are now trading in the $12-$13 range.

COMMEMORATIVES: Many dealers are still actively seeking MS-65 commemoratives. There are many "plus" signs on page two. Bidders are still stressing quality and originality. Those most actively sought are: Isabella quarter, Lafayette dollar, Delaware, Elgin, Missouri, and Roanoke.

TYPE: There are buyers of the majority of type coins in all grades at this time. Bid levels appear to be firm and most sellers are holding out for ask. Buyers have definitely been complaining about a lack of merchandise.

GOLD: U.S. gold coins have pretty well stabilized at this time. No motto $5 and $10 Liberties have increased in BU grades.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $349.75 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfeces both sidas

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --end virtually perfect in all other respects. Prices of such seldom encountared specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 -but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individuel issues as listed in the Monthly Summary.

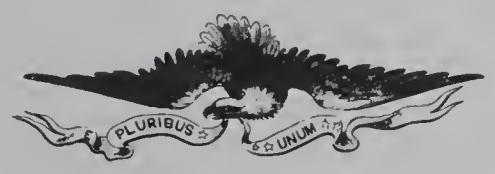
GEM DOLLARS, COMMEMS, AND TYPE DIFFICULT TO LOCATE

W.L. Halves on Numerous Buy Lists; Rolls and Singles



The Market in Depth

As many readers know, (if you're not, you should be aware) the rare coin market has its ups and downs. It had somewhat consistent up and down cycles for many years, until 1976-1980, when the sky was the limit. Coins increased leaps and bounds; generally across the board. Some coins increased ten times (astronomically). Dealers, clients, collectors, all thought prices would never come down. We had reached a new base from which to build. It was forgotten that inflation and the lack of confidence in the dollar helped fuel this continuous price increase.

Well, the bubble burst. Prices could come down and they did. By the time prices came to a halt, most issues still showed a nice profit over the original base. But, the numismatic industry was spoiled; everyone wanted big profits. This is not the consistency with which good business standards are made. Sure, big profits are exciting. But, if everyone becomes a millionaire, then you'd have hobos lighting Havana cigars with $100 bills. The future lies with coins which are properly priced for the grade.

It is becoming more apparent that most dealers across the country feel that we have reached an overall bottom to this market. Many dealers cannot satisfy their want lists. There is not enough fresh material coming onto the market place for the ever increasing numbers of new buyers. A few dealers have stated, "we needed to spend $200,000 for rare coins at a coin show, and could only spend $30,000". As one can readily see this falls far short of locating enough material. When you multiply these figures times the number of other dealers looking for material, one can visualize the dollar volume which could be done. Now granted, a lot of the material being sought is MS-65 and will not surface until bids increase---MS-65 coins in general, appear warm---maybe it's time to look at grades less than MS-65 for future price increases. If the coins are priced according to grade this is a very affordable market.

There are currently a few dealers looking for MS-65 Walking Liberty halves from 1934-1947 inclusive. They will take quantities of all dates. One dealer, who needs as many as 100 of each, of some dates, indicates his inventory is down to approximately five coins in the run from 1934 thru 1939.

This Week's Market

CENTS: Just when it appears that BU Lincoln rolls are beginning to firm up, a couple dealers pop up willing to sell a few selected dates at less-than bid prices. This week 1940-S, 44-D, 48-D, 50-P, 51-P,S, 52-D, and 53-S, all retreated slightly. In later rolls, the 1960-P small date and 1970-S small date lost some ground. An extensive list of 1983 DD cent with ANACS papers has been offered at: AU 50/50 - $125; AU 55/55 - $135; MS 60/60 - $190; MS 63/63 - $250; MS 63/65 - $260; and MS 65/65 - $325.

NICKELS: For the first time in many years circ sets of Jefferson nickels are wanted in large quantities. They will take 1 - 200 sets. Dealers have slowed down their under-bid offers to sell BU Jefferson nickel rolls. Whether this is temporary or not remains to be seen.

DIMES: BU Mercury dime rolls are still wanted at current levels with the 1941-P, D, 42-P, D, 43-P, and 45-P wanted in quantities. BU Roosevelt dime rolls have the usual buyers bidding on all rolls, while the 1959-P, D rolls are wanted at higher bids.

A few of the late-date proof rolls are still reaching for new lows.

QUARTERS: The 1958-P BU roll is quite "hot" with many bidders wanting quantities. The 1982-P BU roll is now bid at $16 per. This seemingly common two-year old roll has been quite elusive as no bags are available as of this writing and bidders will take up to 100 rolls each.

MS-65 Washington quarters, 1932-1939, appear to be stirring, but it's too early to tell whether bids will advance.

HALVES: The few conservative buyers of Walking Liberty halves is beginning to blossom as more dealers jump on the buywagon. A few more dealers are looking for original rolls at current levels. If bidders continue, rolls could begin to move.

Buyers of MS-65 W.L. halves are beginning to run seriously low of inventory. They have increased their bids substantially, as will be noted on page two.

DOLLARS: Circulated bags have fallen off a little as premiums drop for VG's. There are bidders of specific grades which are keeping prices up on Fine and better Morgans. BU 'S' mint dollar rolls increased this past week as inventories dwindle---original rolls.

Prooflike Morgan dollars in MS-65 have shown some increased bidding as buyers try harder to add coins to their inventories.

PROOF SETS and MINT SETS: The 1956-1963 proof sets are still "hot". (The 1957 and 1960 have temporarily reached their top in the bidding war.) There are still many bidders for these, as of late, under valued sets.

The 1983 no 'S' proof set bid has increased to $690 per.

COMMEMORATIVES: Many dealers have recently reported selling more Commems in the last month than they have in the last year. This practice is increasing weekly and is not losing any steam as of yet.

TYPE: Some dealers are beginning to make stronger attempts at buying circ type. Most buys are at current levels, although a few seated quarters and halves have increased.

There have been some minor increases in MS-65 material, as buyers are looking for most type coins. Again, dealers are finding it difficult to locate material.

GOLD: Circulated grade twenties are showing a little weakness, while the rest of this series is somewhat stable. MS-63 coins have dried-up to the point where they seem almost non-existent.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $348.50 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$25.00 per column inch; 2 column inches maximum

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (UNCIRCULATED) About uncirculated showing no evidence of rubbing or handling. However, no further qualifications are necessary. May have bag marks and/or weakly struck; may not have full luster.

MS 63 (CHOICE UNCIRCULATED) Will have minor bag marks may show only a slight weakness of strike. These are well above average coins.

MS 65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS 65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS 63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS 63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65---but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck ---and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to data.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63---but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

1956-1960 Proof Sets Still Wanted in Quantities

The Market in Depth

Walking Liberty half dollars are considered to be one of the most beautiful coins ever minted by the U.S. Mint. They were traded at their peak in 1980-81. They seem to be gaining in popularity again.

The following prices are intended to inform the reader of the vast price changes which have occurred in MS-65 Walking Liberty half dollars over the past 3½ years. This chart depicts Walking Liberty halves at a time when the whole coin market was at a high, again when it was at its lows, and current prices.

1933-S	3,100	1,100	--64.5	2,000	--35.5

As one can learn from this chart, every date has dropped since 1981, except the 1920-P. This seems to be a very common date in AU, MS-60, and MS-63, but is truly elusive in MS-65. This might indicate that it was undervalued in March, 1981. As for conclusions, one must draw their own . . . . .

This Week's Market

CENTS: The BU Lincoln roll market was relatively quiet this past week. BU rolls have been battered repeatedly for the last few weeks with no significant action other than lower prices.

NICKELS: BU Buffalo rolls are fairly active at current levels, although some 1938-D rolls were offered at less than bid. They were purchased immediately, thus showing strength in this market.

The war nickel series is not as active as it was a few weeks ago. From time to time various rolls do trade hands at current bid levels. The rest of the Jefferson series is somewhat sluggish as bidders bypass this area. One active date is the 1950-D roll which is wanted at bid.

DIMES: BU Mercury dime rolls are still wanted at bid, while some BU Roosevelt dime rolls are beginning to slip a little. There appears to be an over-abundance of some dates in dealers' inventories. Please check page three for dates affected.

QUARTERS: Some early Philadelphia Washington quarter rolls slipped a little this week. The BU 1935, 36, 37, and 40 were the rolls showing losses. In the more commonly traded rolls prices were weaker for 1944-D, 45-D, 49-P, 51-S, and 1962-P, D thru 1964-P, D. Buyers are still trying to purchase large quantities of 1958-P at $125. The 1982-P roll has suddenly shot up to a bid of $18 per and none have surfaced as of yet.

HALVES: Gem Walking Liberty halves are still on the upswing as bidders dutifully try to locate any and all quantities. Buyers are still complaining about the lack of nice material and inventories are quite low. Some bargain hunting is still being attempted for BU rolls but there are bidders at current levels.

Later date BU Franklin rolls (1960-1963) have shown discouraging signs recently as some dealers attempt to take profits.

DOLLARS: One will notice some changes for MS-65 Morgans on page five. Some bidders are going to "greater lengths" to buy these coins. There are not that many out there in the first place. In order to locate pieces, prices must go up some so that sellers will be encouraged to take profits.

Original BU rolls are very active at current levels as buyers and sellers continue to get together. Specifically, Peace dollars are very active as many dealers are looking for the hard to find "original" rolls.

PROOF SETS and MINT SETS: Buyers are still increasing bids as this price war continues for 1956-60 proof sets. There are apparently many dealers involved in this promotion. Usually dealers ask for "unspotted" sets, but in this case, they will take sets "with a little spotting".

Mint sets are extremely quiet, except for original 1948-58 sets, which are wanted at current bids.

COMMEMORATIVES: Much attention has been drawn to this area of the market as prices continue their upward movement. There have been a few large transactions take place in the last couple weeks and prices were generally over bid and ask. Although these deals were sizable, dealers still complain about the lack of gem material.

TYPE: As with commems and dollars, type seems to be following in their path. Bids are beginning to increase for MS-65's. Want lists are more extensive, but quality must be there.

GOLD: The most notable change sees MS-65 St. Gaudens increase to $1750 bid. No motto $5 and $10 have again increased in MS-60.

The circ grade $10 and $20 gold pieces have fallen as gold bullion weakens. This area of the market is temporarily tied to the price of gold bullion.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $336.00 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (UNCIRCULATED) Barely uncirculated showing no evidence of rubbing or friction. However, no further qualifications are necessary. It will be bag marked and/or weakly struck may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63--but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

COMMEMORATIVES ATTEMPTING TO RALLY THE REST OF THE MARKET

Renewed Interest in BU Mercury Dime Rolls

The Market in Depth

While comparing the two parts of the series on Walking Liberty halves (the first was September 14), one will notice that most of the later dates (1934-47) have increased in value between 1981 and 1984. Whereas, the earlier dates (1916-1933) have decreased over the same period. This might suggest that the later dates are more difficult to find, when in all actuality, the later dates are more tradeable; that is, they are in a price category that makes them more affordable and there are sufficient quantities available in which to make a market.

This Week's Market

CENTS: Again this week BU Lincoln roll prices remain the same. Action has been very light and sporadic as interest is on the mild side, to say the least.

NICKELS: There does not appear to be as much activity lately for BU War nickels. General offers to buy are in the bargain hunting range, although a few specific buys are still in the bid range. Not many rolls are being offered for sale. When rolls are offered a little under bid, they are immediately purchased.

Bidders may have backed off a little on BU Buffalo rolls as there was an absence of action.

DIMES: BU Roosevelt dime rolls were active at current levels as the main buyers continue to stockpile original rolls. The one exception was the 1949-D roll which slipped to $390 bid.

BU Mercury dime rolls are beginning to receive a lot of attention. Rolls from 1934 thru 1945, including the mintmarked rolls, are being sought; bidders have had modest success.

QUARTERS: The BU 1958-P quarter roll is still wanted, by many bidders, at higher bids. The rest of the Washington series is still fairly active. A few of the early mint-marked Washington's increased in MS-65 (34-D, 35-S, 37-D, and 38-S).

HALVES: A few new bidders have been added to the growing list of buyers who are searching for original rolls of Walking Liberty halves. Mostly looking for later dates, the buyers do not want "put-together" rolls.

BU Franklin rolls are mixed this week as buyers and sellers are both active. Bids remain the same except for, 1948-P ($400), 52-S ($735), 1955-P ($305), and 1961-P ($180).

DOLLARS: In general, dollars are very active in all grades. There are many buyers for every condition. Recently, some original bags sold for as much as $43,000 each, while single rolls are still being traded at bid/ask levels. There have been a number of dealers looking to buy MS-63 to MS-64 dollars; this may be an area to watch.

Although not yet strong, most of the sellers of "Ikes" and "Anthonys" are for mixed lot quantities. The 1971-S "Blue Ike" is the only one offered in large quantity.

PROOF SETS and MINT SETS: The silver proof sets (1956-63) are still very active as most received higher bids this week. At this time, there are no signs of weakness.

COMMEMORATIVES: There is another long list of price increases for MS-65 commemoratives. This market appears very strong with many active buyers.

Joining in the price increases are MS-60's, now wanted in quantities. These buyers do not want "sliders", only new coins.

TYPE: There are a few scattered "plus" signs for MS-65 type this week. There is a definite lack of fresh MS-65 material.

GOLD: There are a few increases in MS-65 gold as the St. Gaudens seems to be the most sought after ($1800 - bid).

There appears to be an overabundance of circ. U.S. gold on the market (VF - AU) at this time. Some dealers, who inventory this type of material, are afraid this market may be slow until the gold market begins an upward movement.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion ralatad gold coins in this issue are figured on a basis of gold at $336.75 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$35.00 per column inch, 2 column inches maximum

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (UNCIRCULATED) Strictly uncirculated showing no evidence rubbing or friction. However, no further qualifications are necessary. It will be bag marked and/or weakly struck may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS 67 PROOFLIKE (SUPER8) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63--but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

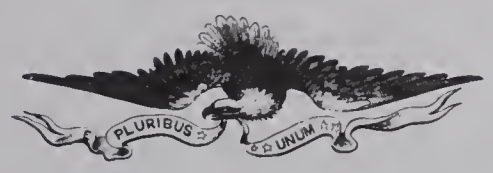
BID INCREASES ON MANY MS-65 DOLLARS

Dealers Complain of Short Supply of Nice Coins

The Market in Depth



BU Mercury dimes are beginning to show increasing signs of activity. There are a few major buyers now, who not only want original common date rolls, but will also buy mintmarked rolls in the 1930's (1934-39). Bargain hunting had been the practice (attempting to buy original rolls at less than bid prices has been less than successful) until recently when new buyers began "testing the waters". The current buy requests range from "original rolls only" to "original rolls with some split bands; will pay over ask". However, choice original rolls are few and far between at the moment. The occasional roll or two which does appear usually carries a price tag around "ask" or a little more. The bargain rolls which appear from time to time will usually be of inferior quality.

The Ike dollar series is nothing to write about---or is it? Thought to be at its bottom a month ago, it has suffered a few more losses recently. Dealers offer to sell mixed lots at discount prices, while bidding is in the low bargain hunting stage. One good thing can be said about some of the dates. "They can't go much lower; they will be below face."

Somewhere, sometime sellers are going to refuse to sell at discount prices. The entire BU roll set (including proofs) is approximately one-third of its alltime high. But just when one thinks its time to take a position, more "minus" signs. This series is definitely tied to the overall market. When the general market heats up so will this series.

The Susan B. Anthony dollars have followed the same path as the Ike dollars. Dealers keep selling at discount prices and there are no volume buyers at this time. There are a few low mintage dates (1979-S, 80-S, and 81-S proof and 1981-P, D, S, in BU) which eventually will be recognized as scarce in relation to the common dates, but for the time being these issues lack luster.

In the long run both of the previously mentioned series will become more active. They are coins which could be collected by the novice without the major grading problems which govern other areas of the rare coin market.

This Week's Market

CENTS: Action in BU Lincoln rolls remains quiet except for six dates currently being sought. There are very few bidders at present. When bids are seen they are definitely at bargain-hunting prices. Mixed lots of different dates are usually available at discount prices, but there are usually some inferior rolls included. The 1983-P double die cent has been offered at $105 in AU.

NICKELS: Some BU war nickel rolls are beginning to show signs of profit taking. There are sellers offering individual rolls at discount prices. Most of the rest of the Jefferson series is being ignored for the time being as buyers have dwindled to but a few bargain-hunters.

DIMES: Though prices are unchanged this week, dealers are bidding for BU Mercury rolls. Practically all of the 1934-45 rolls are appearing on want lists (See The Market in Depth).

BU Roosevelt dime rolls appear to be slowing down a little. A few of the major buyers have dropped out of the "bidding war" and the ones remaining have lowered their buy prices.

QUARTERS: The 1932-S Washington quarter is now bid at a higher $1400 in MS-65. On the other hand, the 1937-D roll is lower at $1900 bid. The 1950-S roll is lower, while the the 1958-P roll is still very active at current levels. The rest of the Washington series seems to be taking a little breather.

HALVES: Most of the dealers that were buying BU Franklin rolls are now in the selling mood. There are some "minus" signs this week as a few dealers attempt to reduce inventories. As per usual, there are exceptions to the rule. A few dealers tried very desperately to locate 1953-D and 55-P rolls. Increased bids can be found on page three.

The BU Kennedy set (proofs included) has fallen to a new bid of $135.

DOLLARS: Complaining about a lack of fresh material, a few major buyers have increased their buys for MS-65 dollars. These changes can be found on page five. Most of the buyers are looking for the more moderately priced dollars ($5000 and under). Dealers feel these coins have a lot more room to increase.

There are increased attempts to purchase the following BU original rolls: 1878-S, 79-S, 1921-P, 22-P, and 23-P.

PROOF SETS and MINT SETS: The silver proof sets (1956-64) are still active at current bids. But for the first time in a month, there were no price increases. The rest of the proof sets are somewhat quiet except when offered in lots.

The 1965 and 66 sms were higher this week while the rest of this area is quite slow.

COMMEMORATIVES: There are "plus" signs all over page two this week as many issues (MS-60 - MS-65) are wanted in various quantities by many dealers. There are still complaints of overgraded material being sent dealer-to-dealer. They want properly graded coins.

TYPE: Most of the buyers of type coins are currently concentrating on locating MS-65 coins. There are bargain hunter bids, but there are also buyers at "bid" to above "ask" on properly graded coins. There are a few more "plus" signs this week.

GOLD: MS-65 St. Gaudens have again increased as bidders feel this coin is in very short supply. Most dealers feel that the supply of nice U.S. gold coins out of Europe has dwindled down to a mere few pieces.

☆

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on e basis of gold at $345.00 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mintt issues) are worth more than listed prices.

MS-60 (UNCIRCULATED) Barely uncirculated, showing no evidence of rubbing or friction. However, no further qualifications are necessary. It will be bag marked and/or weakly struck, may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63, but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65 - but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck -- and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 - but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

U.S. COMMEMORATIVE SETS ON WANT LISTS

Many Dealers Search for Original Dollar Bags: Elusive

The Market in Depth

As U.S. Commemoratives continue to move along in an upward fashion it will be noticed that the MS-60 and MS-63 columns have been showing increased activity over the last couple of weeks. As is usually the case when MS-65 of a specific series is hot (which is the case with MS-65 commemoratives) the lower grades will begin to follow after an extended length of time. This will usually occur because dealers and collectors like to buy coins that are increasing in value. Yet, in a hot market, coins will increase so fast that most buyers get left behind. In order to get in on some of the action, buyers will have to purchase coins of various quality within that series. Usually, when MS-65 coins get hot, the lower quality coins will not increase the same percentage. But in the case of silver commems there is a better chance of proportionate price increases, primarily because of the overall low mintages of the entire series. This does not mean all grades of silver commems will go up equally, but they could increase in closer proportions than most other series.

On the most wanted list at this time are MS-65 commemorative sets. It is very difficult to find original, evenly matched sets. One will usually find one or two of the coins in a set have either been replaced or have problems. The following list is an example of prices paid in dealer-to-dealer transactions for commemorative sets which were all evenly matched gems:

Set	MS	Price
1935 Boone	65	$ 825.00
1935 Texas	65	$1000.00
1937 Texas	65	$1100.00
1938 Oregon	65	$ 900.00
1939 Oregon	65	$1700.00
1939 Arkansas	65	$2000.00

These prices realized will give an indication as to what dealers are willing to pay for the right coins. The aforementioned sets were all MS-65 and original matched sets.

When coins have a little extra flash, color, or strike they can command extraordinary prices. An MS-65+ Maine sold for $750. While an MS-67 brought $950. An MS-65+ Gettysburg was purchased at $550. An MS-65+ Rhode Island with exceptional luster was sold for $300. A run of Gem Texas sets from 1935 to 1938 sold for approximately 18% over bid. The coins were all evenly matched in an original album.

This Week's Market

CENTS: Although last week saw some price increases for a very few BU Lincoln rolls, this week is a better indication of this market. Most, if any, of the bidding has been at discounted prices. There have been various rolls offered for sale at bid with a couple at new lower bids (1939-S, 1955-S). The 1964 proof cent roll, which is a new entry on page three, fell to $18 bid.

NICKELS: BU war nickel rolls have not seen much activity this week, but what little there has been, was at current levels. The rest of the Jefferson series was somewhat active this week, but most was at discounted prices---offers to buy and rolls offered for sale. The bidders are definitely picking out rolls they feel are underpriced and then offering a percentage off of bid. As of yet, most dealers are not very eager to sell at discount prices.

DIMES: Bidders are still actively seeking BU Mercury dime rolls at current bids. As of the moment they are still reluctant to increase bids. Again it can be mentioned that there are very few rolls being offered.

BU Roosevelt dime rolls are beginning to see a few "minus" signs appear. This week 1951-S and 1952-S are lower, along with 1955-D. Most of the major bidders have lowered their buy prices.

QUARTERS: A couple MS-65 Washington quarters increased this past week (1932-P and 1935-D). As for BU rolls, some of the dates are going by way of the Franklin series. The 1941-S, 43-P, 45-D, 49-P, 50-S, 55-D, and 59-P all decreased this past week. A few dealers feel it's time to sell off some rolls which may be a little too high. The only real bright spot is the 1958-P roll is still climbing; now at $140 bid.

HALVES: A few more BU Franklin rolls have slipped lower (1948-P, D, 1950-D, 1954-P, 1957-P, 1958-D, and 1959-P). This is the second straight week that the 1948-P, 54-P, and 57-P have fallen. The 1955-P roll is still popular at a higher $320 bid.

DOLLARS: This week reveals more "plus" signs for MS-65 dollars. Buyers find it extremely difficult to locate coins. Also difficult to purchase are original Morgan dollar bags. Along with the usual strong buyers some others have joined in the hunt. Most all want original, unpicked, clean, with no flat strikes and they will pay $45,000 per bag. Original dollar rolls are active at current bids with the exception of 1880-S, 81-S, 98-P, and 98-O which all increased this week.

Ike and Anthony dollars remained about the same as interest is still lacking in this area. Still lots can be found at discount prices, but most dealers are not willing to part with any quantities of specific dates at less than bid or ask.

PROOF SETS and MINT SETS: Although price increases have stalled for the silver proof sets (1956-63) there are still buyers at current levels. Some of the early Franklin proof sets have decreased as support for these sets has disappeared.

The no mint mark 1970-S and 1971-S proof sets decreased as a few of each were offered at discount prices. The 1979-S TII fell to $80 bid.

Mint sets have received very little interest recently; when active they are on the downside as evidenced by 1970's, 73's, and 81's.

COMMEMORATIVES: There are "plus" signs again this week on various issues in MS-60 to MS-65. This is the area where most business is being conducted at this time. With the upcoming Long Beach Coin Show and auction one will be able to see first hand the amount of activity within this series. Attendance should be good, as even the curious want to see the direction, not only commemoratives, but the whole market will be taking in the future.

TYPE: Many dealers have indicated an interest recently, although some are bargain hunting at this time. Some dealers are waiting for a little consistency in this market before they begin raising their buy prices.

GOLD: Some circulated U.S. gold bids were lower this week as inventory heavy dealers drop their sell prices. This market is inclined to be a little soft as long as gold is under the $350 per ounce area.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $345.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$35.00 per column inch, 2 column inches maximum

Advertising space is limited, ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same charecteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 but may also include MS-65 exemples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

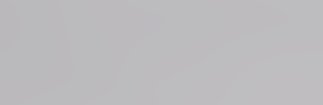
AVAILABILITY OF MS-65 U.S. GOLD: FEW AND FAR BETWEEN

U.S. Commemoratives (All Grades) Enjoy Increased Interest



The Market in Depth

As could be expected, MS-65 dollars and silver commemoratives were "hot" at the just concluded Long Beach Coin Show. Somewhat unexpectedly, MS-65 type and U.S. gold also was in demand. Some of the recent marketmakers were left behind in the wake of much higher prices on commemoratives. Don't misunderstand, these recent marketmakers did buy coins, but there were many, many strong buyers of commems at this show. There was some nice material available, but many more coins could have been absorbed into the marketplace. This series contains a very limited mintage and the percentage of MS-65 coins is quite small.

Along with 65's, lower grade commems are very popular. A number of dealers are buying XF/AU coins and sending them to Europe. Other dealers have increased their buy prices in order to step up sales or to build up their inventories. Nevertheless, one problem still occurs as some dealers attempt to push their coins a grade. This may have been the only reason some commems did not sell at least once.

Attendance was a factor at this show. Many people turned out to see what direction the market is headed. As a result, many more dealers stayed at their tables for a longer period of time than usual. Despite the holiday and some recent bad press many dealers reported having very good shows. If one had the right material, sales were brisk. If one had circulated, overgraded or overpriced material, did not have MS-65 (gold, commems, dollars, type) coins, they may have reported a slow show. We are in a highly specialized market at this time. Customers are very grade conscious. They will spend extra for a properly graded coin of their choosing, but they won't spend anything near bid for an overgraded coin.

Another series which could be described as somewhat spectacular was MS-65 gold. More specifically---St. Gaudens. All U.S. gold in MS-65 condition was wanted at or above current levels, but was rarely encountered on the bourse floor. There was a small amount of twenties available (hardly enough though) which sold at a low end of $2000. One deal of 39 St. Gaudens sold initially at $2000, then, at least twice more at higher figures. The coins were all nice MS-65's, no better, no worse. They were original, undipped, deep color, and full lustre. All coins did have a few bag marks; they were not perfect.

This Week's Market

CENTS: The 1983-P double die cent, although not always conspicuous, has been trading hands on a fairly regular basis. The following bids were recently monitored by a few buyers: XF - $75; AU - $105; MS-60 - $125; MS-63 - $150; and MS-65 - $190.

NICKELS: After some weeks of discounted bids or just plain inactivity, BU Jefferson rolls are beginning to show some signs of life. There were bidders looking for various rolls at bid and a few at higher bids. Those increasing were the 1940-D, S, 1949-S, and 1950-P. It remains to be seen whether the other active bidders will continue to increase their buy prices.

BU Buffalo rolls are still wanted at current levels, although the bidders are somewhat picky and the rolls must be original.

DIMES: Original BU Mercury dime rolls are very difficult to locate especially at current levels. Owners of these rolls feel it is just a matter of time before these rolls begin to move. Sure, one can find small deals of partial rolls, put-together rolls, or singles at discount prices, but nice original rolls are not available at current prices.

BU Roosevelt dime rolls were somewhat active at the beginning of the week and a few dates increased (1954-S, 57-D, 59-D). By the end of the week activity was definitely on the quiet side.

QUARTERS: Many MS-65 Washington quarters have increased (1932-P-40-D). Buy prices have increased almost across the board. This series is difficult to locate in MS-65. Most coins, upon close examination, have little pin marks about the field or face.

HALVES: Original BU rolls of Walking Liberty halves are very active, as buyers look for the one or two MS-65 coins which may or may not be in a roll. MS-65 Walkers are on a number of want lists as dealers and collectors try to fill their needs. Most BU Franklin rolls appear to have hit the skids. (There are a half dozen or so dates still being sought at current levels.) Many dealers are attempting to sell rolls at discount prices. The only good indication is that there are still buyers at discount prices so there are still sales being consummated.

DOLLARS: There is increasing action for MS-65 dollars; BU and prooflike. This week's rash of "plus" signs are the most seen in many weeks. To some sellers, today's buyers may seem overly fussy, but the fact remains that for these high prices offered, dealers want nice coins. This is for the protection of themselves and their customers.

There are also a number of bidders trying to purchase better date graded dollars. Please check page four.

Ike and Anthony dollars remain about the same with only a few "minus" signs this week for Ike's.

PROOF SETS and MINT SETS: The silver proof sets (1956-63) remain active at current levels.

Most dealers are ignoring mint sets at this time as there is only one change. The 1966 sms increased to $2.70 bid.

COMMEMORATIVES: This series remains very active. Bids keep increasing as buyers attempt to buy just about everything in MS-65. Lower grades are active also. (See Market in depth).

A few MS-65 gold commems have increased bids. These are difficult coins to locate as most are just a point off of MS-65.

TYPE: Many dealers are actively searching for MS-65 type. There was very little in the way of nice type coins on the bourse floor at the Long Beach Show. What was available, sold at or above current levels. See page six for price increases.

GOLD: The MS-65 column is almost filled with "plus" signs. Dealers complain of needing and not finding nice material. Very few pieces were even located, let alone sold at anywhere near "ask". When coins are found sellers usually want over "ask".

Dealers were looking for MS-60-MS-65 Type II $1 and $3 gold. None were to be found.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $343.00 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

AU (ABOUT UNCIRCULATED) Will have considerable remaining luster but will show wear on the highest points of the coin. Some slight wear is necessary for an AU coin but the bag marks and slight weakness of strike may have been removed by a very light cleaning.

MS 63 (CHOICE UNCIRCULATED) Will have minor bag marks may show on only a slight weakness of strike. These are well above average coins

MS 65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning) MS 65's are only a small (but varying) percentage of available uncirculated specimens of any date

MS 63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS 63 but with the additional feature of deep mirror prooflike surfaces both sides

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 -but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

MANY DEALERS SEEKING MS-65 PROOFLIKE DOLLARS

Original Morgan Bags Wanted at $45,000; 'S' Mint Bags at $75,000

The Market in Depth

If one compares today's rare coin market with various periods in the past one will find that many aspects of our industry have improved. First and foremost we have become more professional as a whole. Compared to other major industries and other types of investments we have come a long way, quickly. Mistakes may have been made, but we all work diligently to correct them and learn from them. (The stock market and savings accounts are still not perfect after all the years they have operated.)

Our professionalism is seen in the way we have begun to police our sales and to educate our customers. Dealers and organizations act as "watchdogs" over quality and pricing of coins. These methods are not perfect yet, but are a step in the right direction.

Education is probably the most important topic of "our time". Customers who purchased coins without regard to exact grade in the past, have now become very grade conscious. Moreover, their education has led to a reawakengin and reeducation of professional numismatists. Some may sit back and complain about stricter grading standards, but the astute majority will recognize that the tightening of grading standards will be for the benefit of numismatic professionalism.

EDITOR'S NOTE

A few years ago, some quick-thinking persons found a gimmick for making money in a not so legitimate manner. They would take 1973-S Clad proof Ikes (current bid - $1.60) and place them in the plastic government holder that originally housed the 1973-S Silver proof Ikes (current bid - $49.) They would then sell the phony silver proofs to unsuspecting buyers. Well, it's happening again. So, be aware of this scheme. When you purchase them in the government plastic, make sure the plastic has not been opened and resealed. Check the coins carefully.

Apparently the grading of proof sets is a very misunderstood subject. All coins in a set may not grade the same. This fact leads to the reason why one can take a proof set (ex-1951, bid - $235) and sell the coins separately as MS-65's for a total of $343. This cannot be done all the time. The coins have to be nice. They cannot be spotted, hairlined, streaked, or weak-struck. They cannot have staple scratches, die polish marks, lint marks, nicks, or fingerprints. As long as there are strong buyers of single MS-65 proof coins, the single price will be out of whack in relation to the whole set.

This Week's Market

CENTS: Over the last few weeks BU Lincoln rolls have remained somewhat quiet. This week is no exception. Bids, what few there have been, are at discount prices. Most dealers will not even consider selling nice original rolls unless offers are in the bid/ask range. Nonetheless, there have been some proof rolls offered at lower prices. Most of the rolls from 1964 to 1983-S have decreased.

The 1983-P double die cent has remained steady with a few sales noted. Bids remain the same: XF - $75; AU - $105; MS-60 - $125; MS-63 - $150; and MS-65- $190.

NICKELS: There have been very few transactions completed recently for MS-65 Jefferson nickels. This series seems to trade only as BU rolls for the moment. There is some increasing activity for BU Jefferson rolls. Along with this activity some increased prices have occurred (1938-P, 42-P, and 44-S). As with Lincoln rolls, many of the proof Jefferson rolls have lower bids this week. Please check page three.

DIMES: Trading in BU Mercury dime rolls has been light this past week, while BU Roosevelt rolls have become busy again. Those with increased bids are 1948-P, 54-S, 58-P, and 62-D. Various proof rolls showed some weakness as bids decreased.

There has been very little action for the 1982 no 'P' dimes lately. What has been seen are mostly offers to sell. Latest "ask" prices for ANACS graded, full struck coins: MS-63/65 - $145 and MS-65/65 - $175.

QUARTERS: Interest in BU Washington quarter rolls has become somewhat limited at this time. Bids appear to be firm up to and including 1964, but most dealers are taking a "wait and see" attitude. Many of the late-date proof rolls have slipped lower.

HALVES: Although a majority of the sales are at discounted prices, there are some BU Franklin rolls still wanted at higher bids (1951-P, 52-P, D, 54-S, 55-P, and 56-P). The Franklin series has enjoyed a nice run of "plus" signs for many weeks. So it's understandable if there's a bit of a sell-off with some profit-taking.

The Kennedy series seems to be suffering a little right now as some rolls have drifted lower; included are most of the proof rolls.

There has been a major increase in proof Franklin halves over the last few weeks. Buyers are looking for 1956-1963 with MS-65's commanding new higher bids. Bid on common dates has jumped to $16 per, but as always, the coins must be nice.

DOLLARS: There is another series of price increases for MS-65 dollars. There are a number of dealers who are attempting to stock up on the elusive MS-65 dollars, but their inventories sell faster than coins can be purchased.

BU dollar rolls remain about the same, while original bags are still being actively pursued. There are now bids of $75000 for original bags of non-picked 'S' mints.

There is another series of "minus" signs for Ike and Anthony dollars. This seems to be like a broken record as each week sees lower prices. One would think these decreases would eventually stop . . . . . .

PROOF SETS and MINT SETS: The 1951-53 proof sets are lower this week, while 1956-63 are still being sought at current bids.

Most mint sets have remained the same, although 1966 sms bid has increased again.

COMMEMORATIVES: There is constant activity with this series in all grades. Bidders have temporarily curtailed their daily bidding war tactics. Although there have been many transactions completed, some dealers feel that a constantly increasing bid will only make the sellers wait until prices slow down. This may or may not be good strategy.

A few examples of prices paid for MS-65+ commemoratives: Bay Bridge - $500; Lincoln-Illinois - $700; Boone - $495; Iowa - $275; and York - $675.

TYPE: Type coins have added a few new bidders in the last couple of weeks. Their bid prices vary from MS-63 bid to over "ask". In fact, one dealer is offering to pay 10% over MS-63 bid to 30% over MS-63 "ask" for MS-64 coins. For MS-65 coins, he will pay 15% back of MS-65 bid to MS-65 ask.

GOLD: Circulated U.S. gold (VF-AU) has again shown some weakness due to the lower price of gold. The $20 St. Gaudens is an exception as it increased this past week (VF - MS-60).

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $340.75 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it every accurate reflection of the market

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker

ADVERTISING RATES

$35.00 per column inch, 2 column inches maximum

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS 60 (UNCIRCULATED) Any piece with average amount of bag marks and abrasions. Some slight weakness of strike is permissible. Coins may be impaired by a number of bag marks and scratches or a few heavy ones. Eye appeal is below average.

MS 63 (UNCIRCULATED) Will have minor bag marks and may show only a slight weakness of strike. These are well above average coins.

MS 65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS 65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS 63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS 63 but with the additional feature of deep mirror prooflike surface both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65 but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

Gem BU Walking Liberty Rolls on Many Want Lists

The Market in Depth

To the average numismatist BU dollar rolls may seem a little quiet at this time. Bid prices have not changed much on common Morgan or Peace dollar rolls in the last month; there are buyers and sellers at current levels. This keep prices firm, but not necessarily inactive. To the informed dealer it is apparent that there is a "behind the scenes" market. As reported last week, there are a number of dealers looking to buy original bags of common Morgan dollars at $45,000 per. Some will pay as much as $75,000 for original non-picked over 'S' mint bags.

These dealers aren't gambling. They have a sure market. They know who is paying "top dollar" for the various grades which may be found in an original bag. The following study shows the breakdown of grades and prices realized per coin. Remember, it is not exact. It may vary from bag to bag and also, from date to date.

Price paid for original common 'P' or 'O' mint bag:
$45,000

Number of coins likely to be graded:

MS-65	MS-64	MS-60/MS-63
30 - 60	50 - 100	920 - 840

Prices likely to be realized by grade:

$225	$100	$40

Ranges of total prices by grade:

$6,750 - $13,500	$5,000 - $10,000	$36,800 - $33,600

Range of total bag price realized:
$48,550 - $57,100

Price paid for common 'S' mint bag:
$75,000

Number of coins likely to be graded:

MS-65	MS-64	MS-63	MS-60
90 - 130	100 - 120	300 - 400	510 - 350

Prices likely to be realized by grade:

$225	$120	$70	$60

Ranges of total prices by grade:

$20,250 - $29,250	$12,000 - $14,400	$21,000 - $28,000	$30,600 - $21,000

Range of total bag price realized:
$83,850 - $92,650

It is necessary to point out a few facts. Single, MS-60 'P' or 'O' mint dollars may sell for only $35 each; while original rolls will sell for $800 or more. These prices may also vary by date or availability. The same condition exists for common 'S' mint dollar rolls which sell for $1200 or more, but singles may sell for only $50 to $55 each.

The prices realized in the two charts are ranges which may or may not be exact depending on the specific date. This information is used to point out some markets which may not be available to every one involved in numismatics. But, these are real, viable markets and there are many buyers at or near these prices.

Another series which appears on the surface to be inactive is the BU Mercury dime roll. There does not seem to be many transactions taking place; but, for good reason. There are a few groups of rolls on the market today which have been picked through and the "cream" replaced. True, these rolls are offered at discount prices, but they are not representative of the bid/ask levels in the CDN. CDN prices are for "original BU rolls". There are many dealers who will pay bid for original rolls. As with original dollar bags, the Mercury dime rolls are broken up and sold as singles. At today's prices, one needs to find only about five coins in a roll that will sell as "MS-65, Full Bands" to make the roll profitable. For example, if one takes an original roll of 1944-D dimes and sells 5 coins at MS-65, Full Band money (bid-$55), it would total $275. If the balance of the roll was sold at 20% back of bid, which totals $486, the total selling price of the 50 coins would be $761. This looks like a 13% profit; and if the balance of the roll sold closer to bid, then the profit would be increased.

This Week's Market

CENTS: Although still very much on the quiet side, a few BU Lincoln rolls realized increased bidding this past week. With a little astute thinking, it is not difficult to figure that original BU rolls, especially rolls in the 30's, will contain some underpriced MS-65 coins. It is not very often when one can buy an MS-65 1935-P for roll money. So, to stock up on any quantity of MS-65 coins, one must usually buy rolls and search for these spot-free coins. With this in mind, 1935-P and 1936-P rolls showed an increase in bid this week.

NICKELS: BU Jefferson rolls are somewhat mixed this week with more "pluses" than "minuses". The gaining issues were 1940-D, S, 41-P, 46-S, 49-S, and 52-D. Those showing losses were 1949-P and 1950-D. This makes bid on BU singles a little over $5 each for the 1950-D.

The proof Jefferson rolls which were lower last week, have firmed up a little this week (except the 1964-Pr. which is lower).

DIMES: BU Roosevelt dimes appear to be the strength of the BU silver roll market. There is more activity on both sides (buy and sell) of the market than in other BU rolls. Those rolls receiving the most attention are 1946-P, S, 47-S, 48-S, and 59-D. Most of the other rolls are very active at current levels.

As mentioned in "The Market in Depth" BU Mercury dime rolls are active if they are original. If they are put together or if the "gem" coins have been removed from the rolls, then they can be bought at discount prices.

QUARTERS: BU Washington quarter rolls are receiving almost as much positive attention as Roosevelt dimes. A number of rolls increased (1947-S, 52-S, 53-S, 54-S, and 58-P), while a couple rolls decreased (1944-D, 45-P). A majority of the other rolls are active at current levels.

HALVES: There are some new strong bids for BU Walking Liberty rolls which could create more activity. At this time, most bidders are looking for better than average rolls.

BU Franklin rolls are still quite mixed, but activity seems to be on the increase. Three of the four rolls showing a decrease are bid over $600. While six of seven rolls with "plus" signs are bid at $380 or less. This may not be a predictable pattern, but for now the indication is clear.

DOLLARS: There are a number of "plus" signs for MS-60 and MS-63 Morgans as dealers begin to hunt for decent middle priced coins. MS-65 dollars are still very active as bidders seek to purchase all that become available. Prooflike, MS-65 Morgans are still very much in demand as bidders simply say, "please quote".

Ikes and Anthonys---nothing unusual here; more "minus" signs. These two series just continue to decrease.

PROOF SETS and MINT SETS: The 1950-53 proof sets are definitely on a downtrend, although 1953 did not "minus" this week. The 1956-63 proof sets are still active as buyers strip the Franklin half from the set. A few higher bids have been seen, but only for small quantities. The 1984-S proof set has a bid/ask range of $11.50-$12.

Mint sets continue to indicate a lack of interest. The 1947 set showed a decrease along with the 1973 set. The only increase was the 1965 sms.

COMMEMORATIVES: After a slight breather in the bidding war last week, this week sees a continuation of the gains in, not only many MS-65's, but also, the XF/AU - MS-63 grades. This increased activity has more and more dealers becoming involved and attempting to increase their inventories.

TYPE: There is a surprising number of "minus" signs in circulated type this week. Offers to buy are typically at bargain-hunting bids. While, various lots have been offered at discount prices. There are very few changes on the upside for BU and proof 65's.

GOLD: Circulated U.S. gold indicated a few scattered "minus" signs, whereas, MS-65 $2½ Liberties, $2½ Indians, and $20 Liberties showed an increase. The problem with MS-65 gold is almost the same as any other series. The buyers want only nice coins. Locating any pieces at all is tough enough, then one has to pry them loose; usually at "ask" or more. When coins sell at discount prices it is usually becuase the coins may have an extra mark or two which downgrades them to MS-63+ or MS-64.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $339.65 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (UNCIRCULATED) A fully struck coin with slight bag marks, overall shallowness of strike, or evidence of contact marks. However, no further specifications are necessary. Coin may be bag marked and/or weakly struck and may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65---but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck ---and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63- but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

ORIGINAL DOLLAR ROLLS, GEM COMMEMS & TYPE ON MOST WANT LISTS

Circulated Gold Very Active, But at Lower Levels

The Market in Depth

BU rolls of silver dimes, quarters, and halves are some of the most consistent areas of the market in which we are involved today. Whether prices are up or down (mostly up for the last three months), there are always buyers. The reasons for this are three-fold. 1. Mintage figures are deceiving and leads to number two. 2. Availability of BU rolls. 3. Future supply of MS-65 coins. For purposes of this writing silver BU rolls of dimes refers to Roosevelt's, quarters to Washington's, and halves to Franklin's and Kennedy's. We do not presuppose that all dates were melted.

1. Original mintage figures, although accurate at the time, are not relative today. When the price of silver increased to its high point, $50+ per ounce, back in 1979-80, there was a large meltdown of silver coins. With silver going so high, the price of the rolls for their silver value was higher than the price one could get for various rolls as collectibles or BU. This led to vast meltings which included some quantities of BU coins. With all of the various meltings performed, there was no way of keeping accurate records as to quantities and conditions. What we do know is, there are fewer BU rolls available today, which will eventually make for more collectible products.

2. In most cases the original mintage figures are high enough to encourage a highly tradeable product. This increases marketability and the likelihood that a product will be popular as time goes by. If a modern item has such a low mintage that only a few collectors can participate in its availability, it may suffer from lack of exposure and go by the wayside. BU silver rolls are highly tradeable.

3. Quality is the "name of the game" for many collectors and investors. To satisfy this need it will be necessary to search BU rolls for MS-65 specimens. Today's common silver roll coin can be tomorrow's investment MS-65 coin. This practice is in evidence today as many dealers make a market in BU silver rolls. When a substantial amount of a specific date is accumulated, the dealer might break the coins down into three categories: 1. MS-60 rolls. 2. MS-63 rolls. 3. MS-65 singles. The rolls are then sold as rolls according to quality. The MS-65 singles may then be sold at a higher price than the rolls or just put away until demand creates a higher market.

This information has remained constant even in the face of lower prices on silver. If and when silver begins an upward trend, this market could increase even more. But do not draw the conclusion that this market continually increases. What is constant is its consistent tradeability.

There appears to be increased activity in all grades of silver dollars at this time. Dealers are gearing up for the National Silver Dollar Convention and auction in St. Louis, on November 8-11. Many dealers are attempting to stock up on original dollar rolls, MS-65 (BU and prooflike) Morgans, and lately even properly priced MS-63's. Not all prices are on the increase though, as XF Morgans are beginning to show some weakness in bids. Nevertheless, activity remains heavy.

This Week's Market

CENTS: This past week has seen some increased bidding for various BU Lincoln rolls. The bargin hunters find it almost useless to offer bids because, "you get what you pay for". The 1935-P and 1936-P rolls have again increased. Also on the upside were 1940-S, 44-P, 1945-P and 45-D. The 1960-P small date is now "bid" at $72.

NICKELS: BU Buffalo rolls seem to be suffering from the same problems as many other series. If they are not original and they have been picked through, then they will not command current bids. But if they are original they will sell immediately. The only roll which appears weak, is the 1937-P, at a lower $850 bid.

BU Jefferson rolls seem to be on a few more want lists as bids increase on the following rolls: 1940-D, S, 41-P, 46-S, 49-S, and 52-P.

DIMES: Various BU Roosevelt dime rolls are on the increase. The 1946-S, 48-S, 55-P, 57-D, and 58-P have higher bids, while most of the other rolls are very active at current levels.

BU Mercury dime rolls are still wanted at current levels only if original.

QUARTERS: BU Washington quarters are still active, although the number of "plus" signs were fewer this week. The only issues which increased were 1948-S, 52-S, and 55-D. BU single sets were lower this week (1941-64), as a number of sets were offered by various dealers. This phenomenon may occur when buyers are looking for rolls, but do not want sets or singles.

HALVES: There is a 12% premium on BU roll set bid of Franklin halves over single sets. Again, buyers are looking for BU rolls, but are not that interested in single sets. Original roll sets are few and far between and when offered, there are more than just a couple of buyers. Those rolls with increased bids were 1953-S, 54-S, and 55-P.

DOLLARS: Original dollar rolls are again receiving higher bids. The bidders are being a little more selective as to dates desired. Those dates currently wanted at higher bids are 1879-P, 82-P, 84-P, 98-P, O, 1900-O, and 02-O. This does not mean the other rolls are weak; they are still active at current levels.

A few specific dates increased for MS-65 prooflike dollars; although most bidders just list dates with the phrase "please quote". The buyers want only MS-65 coins with deep mirror surfaces on both sides. At these higher prices, close will not do.

Ikes and Anthonys exhibited some firmness this week---obviously not yet a trend. There were no "plus" signs; but now the good news. No "minus" signs either.

PROOF SETS and MINT SETS: Silver proof sets from 1956-63 are once again wanted in quantities. There are a number of bidders increasing their buy prices on 1956, 57, 60, 61, 62, and 63. Please check page five for price increases. There are a few bidders looking to pay higher prices, but only for limited quantities of spot-free sets. The 1984-S proof set is still trading in the $11.50/$12 range.

Mint sets were once again quiet as most bidding was done at current levels. There is a definite lack of interest.

COMMEMORATIVES: Activity remains high for all grades in this series. Everybody wants in on the action. Whether at current levels, over "bid", or over "ask" everybody's a commem dealer. Overall quantities are quite limited so it's understandable how prices continue to increase; except for an occasional breather prices have been on the upswing for about sixteen weeks now.

TYPE: There are a few price increases for MS-65 type coins. Quality is the key as very few strictly graded coins are offered. There are a few new bidders for gem type, but as of yet have not raised their bids.

There are a few more "minus" signs this week for low-grade type.

GOLD: Although gold bullion is lower this week, U.S. gold coins seemed to be very active. Even though circulated coins dropped a little in price, reports from shows indicated a large volume of sales at new levels.

MS-65 gold is still being sought at current levels. Not many coins change hands.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $336.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$35.00 per column inch, 2 column inches maximum

Advertising space is limited, ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (UNCIRCULATED) Fully uncirculated, showing no evidence of rubbing or handling. However, no further qualifications are necessary. It may be bag marked and/or weakly struck, may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63, but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets and BU roll sets in this chart are for "typical" coins. These usually average MS-63 -but may also include MS-65 examples of the issues more easily located in this condition. For strictly MS-65 single sets, use prices for individual issues as listed in the Monthly Summary.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

SILVER PROOF SETS AND TYPE COINS TOP WANT LISTS

All Grades of Dollars Receive Steady Bidding

The Market in Depth

Just when it appeared that price increases had lost their momentum, silver proof sets have taken off again. This time the "hot" sets include 1956-64 inclusive. The 1956, 57, and 58 sets have increased a little this past week, while the 1959-64 sets are very strong and wanted by many buyers, mostly for the half dollar. As discussed in previous articles, dealers are searching for nice, unspotted, hairline-free, MS-65 examples. When one considers that these are the last silver proof halves to be minted, it stands to reason that they could become an excellent item to put away. The individual prices are still quite affordable for the quantity buyers. Although, top quality pieces are not found in every set.

It also stands to reason that the more proof sets that get broken up, the more likely it is that the price of proof sets will increase. The survival rate of silver proof sets is getting lower and lower, while the number of really nice proof sets may become infrequently encountered.

Walking Liberty halves are on a few want lists again after being somewhat quiet for awhile. Dealers are looking for nice original rolls of issues from 1941-47, but they only want "P" and "D" rolls. This is probably because the "P" and "D" rolls are more likely to have a few MS-65 specimens than the "S" mint rolls. Usually "S" mint rolls will have some weakly struck coins which can be very difficult to sell anymore.

The fact that some dealers are looking for nice original rolls at higher prices, reinforces the MS-65 market for Walkers. The usual buyers of MS-65 coins find it difficult to locate any quantities of properly graded coins. Sometimes accused of being too "fussy", the MS-65 buyers make it possible for there to be a substantial market in original rolls. They allow the roll buyers a marketplace for the various qualities found in rolls.

It appears that it is becoming common practice now to buy original rolls of all series in order to "cherrypick" the rolls. The first buyer of multi roll deals is the one who gets the nicest coins. This is why original rolls seem to be on almost everyones' want lists. In most cases, there is a large difference between roll prices and MS-65 prices, so that if one is lucky enough to purchase a better than average roll deal, a nice profit can be expected.

The 1983 and 1984 prestige proof set prices appear for the first time in CDN on page five. These sets are housed in a maroon box and include an Olympic dollar along with the rest of the proof set. The 1983 set trades in the $65-$72 range. The 1984 set in the $68-$75 range.

This Week's Market

CENTS: The 1983-S and 84-S proof Lincoln rolls are wanted in quantity at current levels. The 1960 small date roll is still active at last week's new bid of $72. The rest of the BU roll market is a little quiet, although the early rolls in the 1930's are still active.

The 1983-P double die cent has been offered at $100 in AU. For ANACS graded coins in MS-60/60 and MS-63/63 sell prices were $165 and $185 respectively.

NICKELS: BU war nickel rolls appear to be a little weaker this week, although not many rolls have been offered. Only a few selected dates have been offered and only one or two of each. The 1942-S roll is the only one which posted a loss (bid - $285). Most other BU rolls are stable at current levels.

DIMES: BU roll sets of Mercury dimes (1934-45) show an increase on page five, while individual rolls have remained the same. This is due to the fact that original roll sets are not seen very often. When they are located, buyers will anxiously attempt to buy them.

A few more "plus" signs are scattered throughout selected dates of BU Roosevelt dime rolls. There are still a number of dealers actively seeking these rolls at higher bids (1948-P, 51-P, 52-P, 53-P, 55-P, 58-P, and 59-D). The 1955-P roll was wanted at $115, but was filled before the week was out.

QUARTERS: BU Washington quarter rolls are still on many want lists as buyers seek to locate rolls without continually raising "bids". There are just a few rolls which increased this week (1954-S, 55-D, and 58-P). The hottest roll is by far the 1958-P as many dealers say, "quote me!"

HALVES: As one can see in "The Market in Depth" section, BU rolls of Walking Liberty halves are very much in demand. Many feel it is a very good buying opportunity if one can find nice original rolls. There are quite a few "plus" signs on page two, but the bidding is not limited to only these rolls. Dealers have not raised their buy prices on earlier rolls, principally because there aren't any quantities available. Roll sets (1941-47) have also been increased, up to $50,150, but if an original roll set were offered it would definitely fetch much more.

The 1955-P BU roll is another which is wanted at almost any cost. One bidder will take twenty rolls. New bid is $375 per roll. Other Franklin rolls on the rise include 1962-D, and 1963-P, D.

DOLLARS: Again this week some MS-60 and MS-63 dollars posted gains. Many dealers are looking for original BU rolls at current "bids"; attempting to stock up for the National Silver Dollar Show in St. Louis this week. Most dealers are anticipating a good show and expect 1,000's of dollars to change hands. At the top of many want lists are MS-65 Morgan dollars. This will be the place to buy or sell.

Ike dollars, although a couple issues are lower, seem to have reached a possible??? bottom. There was quite a number of trades this past week at current bid levels. The 1971-S silver proof increased bid to $4.55 each. Yes, there are the usual bargain hunters, but they are not meeting with much success.

PROOF SETS AND MINT SETS: Whether it is anticipation or whatever, each market appears somewhat stable, if not strong. This is one of the strongest areas of the coin market at this time.

Activity in the mint set area has picked up a little this week. Some dealers are again looking for early mint sets at bid levels. The 1965 and 66 sms sets posted higher bids this week, while some others traded at current levels.

COMMEMORATIVES: This is probably the hottest area of numismatics right now. Not many higher bids this week, but just about every coin, in all grades, is wanted at current levels. This week's gainers include: Albany, California Jubilee, Elgin, Lynchburg, and New Rochelle.

TYPE: There are many "plus" signs scattered throughout BU and proof (65) in type. Please check page six for price changes. Most of the changes appear in the proof 65 column as a few dealers attempt to locate hairline-free coins. Whether one agrees or disagrees with the grade of a coin, it is still quite apparent that there are very few 65 coins available on today's market.

GOLD: Although gold bullion increased over ten dollars in a week, circulated gold did not enjoy very many increases. There were a few scattered "plus" signs in MS-60 to MS-65.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $347.75 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (UNCIRCULATED) Struck uncirculated showing no evidence rubbing or friction. However no further qualifications are necessary. May be bag marked and/or weakly struck may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63---but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

Auction Prices Extremely Strong For Accurately Graded Coins

The Market in Depth

EDITOR'S NOTE

Watch for style and color change for your First Class CDN envelope. These changes are designed for speedier and more efficient service. It is grey in color, with blue printing, and blue, First Class diamonds around the border. Look for this new envelope next week---November 23, 1984!

Last week it was mentioned that the silver proof set market (1956-63) was "hot". That may have been understated, as this week they are even "hotter". The 1961-63's are up a whopping 7%. New bid is $16.50 each and there is one anxious bidder at $17.50 for "gem", unspotted sets. The 1956-60 sets did not fare as well, as they only increased fifty cents per set.

The Fifth National Silver Dollar Convention, in St. Louis, is now history. Most dealers have given it a favorable critique. As is usual, not all dealers were successful. But, if one worked the floor, as well as manned their tables, and did not sit back and wait for business, one could boast a "good show".

Along with the annual ANA and FUN Conventions, this is one of the major shows of the year. Included in the convention schedule are special speaker forums, educational seminars (ANA grading and counterfeiting), and an auction by McIntire Auction Company. As usual, there were a number of very nice coins available. To begin with, a proof-63, 1878-8/F, Morgan dollar sold for $1540. The coin revealed a few light hairlines and one small mark on the cheek. The biggest name coin in the auction was an 1895 Proof Morgan; graded "65". There was one tiny mark on the chin, but other than that there were no visible marks. The coin was difficult to grade because it was so darkly toned, thus, the coin did not have eye appeal. But, keep in mind, it is a rare coin. It realized $19,250. In yesterdays real world and todays real world, a "65" coin must have eye appeal. One cannot wish it so. Another proof Morgan received some active bidding; 1903 proof-63. Bidding started at $660 and finally ended at $1650.

Probably the three nicest Morgans in the auction were: an 1879-CC MS-65; an 1879-S MS-67; and an 1885-CC MS-65/67 cameo prooflike (the nicest coin in the sale). The 1879-CC Morgan was extremely clean and fully struck. It sold for $6380. The 1879-S had blazing lustre and almost perfect surfaces. It sold for $825. The 1885-CC Morgan was frosted, clean, had beautiful light toning, with a full mirror. It realized $1650.

There is a major auction going on in New York as of this writing. It is being conducted by Bowers and Merena, Inc. There is a tremendous amount of MS-65 and MS-67 material in this auction. The following is a list of prices realized on the first day of sale; there will be a followup next week.

Type	Grade	Price
1840 No Drap. Dime	MS-65	$5060
1900 Barber Dime	Proof-67	$3850
1903-S Barber Dime	MS-67	$3740
1904-S Barber Dime	MS-67	$3740
1911 Barber Dime	Proof-67	$3520
1855 Arrows Quarter	MS-65	$6050
1871 Seated Quarter	MS-65	$5280
1893 Barber Quarter	Proof-65	$3960
1898-O Barber Quarter	MS-67	$6380
1903 Barber Quarter	Proof-67	$5060
1905-O Barber Quarter	MS-65	$3520

This Week's Market

CENTS: The BU 1960-P sm. date roll has received consistent bids at $72. The rest of the BU roll market has resorted back to its quiet bidding levels.

Bid prices appear to be very consistent for 1983-P D/D cents. But, the selling prices vary as much as 25% depending on the grade. "Bid" in AU is $75, while "ask" is between $100 to $125.

NICKELS: There have been some solid bids for the BU 1950-D roll at $205. Some BU Jefferson rolls are on want lists at higher bids. They are 1938-P, 40-D, S, 47-P, 49-S, 52-P, D, and 55-P. There is activity on many other rolls at current levels.

DIMES: There has been an increase in bidding activity for original BU rolls of Mercury dimes with buyers wanting quantities at current levels.

The same can be said for BU Roosevelt dime rolls. The bidding has been extremely intense on many BU rolls. Most of the bidding is at current levels and quantities range from 1-5 rolls.

QUARTERS: BU Washington quarters are receiving increased interest, but only at current levels. Like Roosevelt dimes, bidding is becoming more consistent. The BU 1958-P roll is "bid" at a higher $185.

HALVES: Original BU rolls of Walking Liberty halves are extremely difficult to locate. As a result, the 1941-47 "P" and "D" issues are all experiencing higher "bids". The buyers will take quantities at the new "bids". Most, if not all of these rolls have been at lower prices for over a year. At this time, the increased "bids" have not done much good.

BU Franklin rolls are still very active, most at current levels, while a couple are higher and a couple lower. The higher rolls are 1960-P and 1962-D. The lower rolls are 1950-D and 1951-S; both considered high priced rolls.

DOLLARS: Reports from the Silver Dollar Convention were encouraging. Many dealers were trying to buy dollars in all grades. There were not as many dollars available as one might presume. Original rolls and original bags were sought without much luck. There are buyers now on original Morgan bags ranging from $45,000 to a new high of $48,500. There are specific buys for various original common rolls as high as $850 per. The activity appears to be on the increase for properly graded MS-63's.

Ike dollars are beginning to show signs of increased bidding. Sets are being bought at current levels; and singles or rolls are receiving buys at "bid" or higher. Of course, some dealers still try to buy lots at lower prices, but the fact remains, Ikes are in medium demand.

PROOF SETS and MINT SETS: This market is attempting to overtake commems as the "hottest" area in numismatics. It seems that the number of buyers increases daily along with new "bids". At the silver dollar show, most, if not all the 1961-63 sets were bought at $16.50 and most resold on the floor at $17.50. The high buyer is extremely picky at $17.50.

The 1965, 66, 67 sms's all had higher "bids" this week. Most other sets were offered or bought at current levels.

COMMEMORATIVES: The commem market (all grades) is still moving rather nicely although, this week bids remained pretty much the same. To illustrate this market, at the silver dollar show, a Lafayette dollar sold dealer-to-dealer for upwards of $5500. The coin was super clean, with great lustre. It was also a little weak in the boot area. The coin was technically an MS-63+, but it had "pizazz". When one looked upon the coin, one did not grade it; just admired it.

Current buy prices for the Washington commems are: BU $7.30 and Proof $8.60.

TYPE: The type market is once again indicating a lack of MS-65 material. Bids have increased on many BU and Proof (65) coins. Some dealers have a need to purchase as much as $100,000 in "65" type coins, but are having a very difficult time locating even a handful.

GOLD: Gold bullion seems to be holding its own at this point. Liberty $20 gold showed an increase in grades VF-AU. MS-60 St. Gaudens are now "bid" at $660.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $347.50 per ounce.

THE COIN DEALER NEWSLETTER

Reports the national coin market on a weekly basis. Under the present system it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer to dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$35.00 per column inch. 2 column inches maximum.

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (EXTREMELY FINE) Strictly uncirculated showing no evidence of rubbing or friction. However no further qualifications are necessary. May be bag marked and/or weakly struck; may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS 63 --but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

BOWERS AND MERENA AUCTION CONFIRMS STRENGTH OF MARKET

Lack of MS-65 Gold Voiced by Many Dealers

The Market in Depth

The market has taken a dramatic step to indicate a reinforcement of the strength of MS-65 type coins. In the latest auction conducted by Bowers and Merena, Inc. in New York, last week, there was as much excitement in the air as has been displayed in some years. To illustrate, the auction, as a whole, brought upwards of 4.3 million dollars. That was approximately 50 percent over anticipated sales. This should bring upon a realization that many areas of the rare coin market are strong and possibly ready to get stronger.

Some examples of the strength of type coins can be found in the prices realized for specific coins. A 1901-S Barber quarter, considered the key to the Barber series, sold for $27,500. The coin was described as better than a "65", and in a discussion with the proud, new owner, found that he was prepared to pay substantially more. Another "big ticket" rarity was the 1876-CC twenty-cents piece. It was an MS-65 and sold for $66,000. It was fully struck on both sides and very clean.

There were more than twenty Barber quarters, which graded proof-65 and MS-65 or better that sold substantially above current "bids". A 1897-S, MS-65, with light golden toning, sold for $4180. Also, a 1908-S, MS-65 sold for $3520. Other highlights were:

Date	Grade	Price Realized
1896	Proof-67	$3740
1898	Proof-67	$5060
1900	Proof-67	$3740
1902-O	MS-67	$4620
1905	Proof-67	$4180
1911	Proof-67	$6600
1913-S	MS-67	$7810

In the Barber half dollar series there were also a number of coins which sold encouragingly over current "bids". Possibly the most spectacular coin in this series was an 1897-S, MS-67. It was original with iridescent toning on both sides. The coin sold for $13,200. Many other coins met today's strict grading standards. To illustrate some:

Date	Grade	Price Realized
1894-S	MS-67	$5720
1895-O	MS-67	$4400
1897	Proof-67	$6600
1898	Proof-67	$8250
1898-S	MS-67	$4620
1908	Proof-65	$5060
1910	Proof-65	$4840

Morgan silver dollars were also extremely active at this auction. The 1895 gem proof-67 sold for $30,800. The following is a list of other dollars which realized prices commensurate to grades:

Date	Grade	Price Realized
1886	Proof-67	$6875
1895-S	MS-65	$7150
1897-O	MS-65	$7150
1900-S	MS-65	$ 990
1901-S	MS-65	$3300
1902-S	MS-65	$1980

Not only were type and dollars very active, but so was the commemorative series. Nice MS-65 and MS-65+ commems sold at prices comparable to quality. Most of these coins had original toning with original holders. Most of the coins were hand-selected by Walter P. Nichols, who was a commemorative distributor. The following are a few of the specific coins with prices realized.

Commem	Grade	Price Realized
Delaware	MS-65	$ 742
New Rochelle	MS-67	$ 770
Maine	MS-65+	$1705
Hudson	MS-65+	$2420
Antietam	MS-67	$1017

It must be realized that the action seen over the last two weeks does not mean the entire market is "bullish". On the other hand, this is a good indication that coins, when properly graded, will sell at or above bid levels. One cannot wish it so; the coins must be ALL THERE.

This Week's Market

CENTS: Some sellers have appeared for various rolls of BU Lincolns. The problem with these lot type offers are two-fold. 1. It is difficult to determine individual quality. 2. One cannot tell which of the rolls is being discounted. This past week has seen some active bidding (at current levels) for 1940-P, D, S, 41-P, 42-P, 45-P, 46-D, S, 47-D, S, 51-P, and 52-P, S. The 1983-P D/D cent was seen offered for sale at AU -55/55-$125; MS-63/63-$225; and MS-65/65-$325.

NICKELS: The BU Jefferson war nickel rolls remain a little "soft", but there are still not many rolls being offered. The only roll which is lower is the 1945-P. The balance of the Jefferson series is fairly active at current levels, although some rolls are wanted between "bid" and "ask". The 1954-S is wanted in quantity at a higher $7.50 per roll.

DIMES: BU Roosevelt dime rolls remain quite strong at current levels. Original rolls seem to have temporarily dried up so bidders feel it will not do any good to raise their buy prices. The exceptions to this rule are 1946-S (bid $230), 1955-D (bid $69), 1958-D (bid $52), and 1959-D (bid $67.50).

The 1945-P BU Mercury dime roll has fallen to a lower "bid" of $525. This is the first date in this series to show any recorded weakness whatsoever.

QUARTERS: BU Washington quarter rolls are in about the same demand condition as Roosevelt dimes. There is strong demand at current levels with the exception of 1954-S ($50) and 1958-P ($190). Two earlier rolls are lower; they are 1942-S and 43-S, now bid at $2950 and $1850 respectively.

HALVES: Original BU rolls of Walking Liberty halves are still receiving their share of increased bidding. Most of the "P" and "D" minted coins from 1941 to 1947 again show higher bids. Demand is strong; quality must be there.

BU Franklin rolls are holding their own on the demand side. Activity is still bright with a couple rolls wanted at higher bids (1955-P, 60-P).

DOLLARS: Activity has really increased for Morgan dollars in less than MS-65 grades. Bidders are attempting to buy semi better date dollars in MS-60 and MS-63. Most of these coins are in the $100 to $250 range.

The last couple of weeks has seen increased demand for MS-65 Morgans. Most, if not all dates, which bid $1000 or less are being actively sought. There is not a large volume of material available so bidding has been very competitive.

Look at page five for new higher "bids" on some Ike dollars. There are a number of dealers hoping to buy at "bid", while others are willing to pay more.

PROOF SETS and MINT SETS: The silver proof sets (1956-64) are still in demand at current price levels. Dealers are looking for large quantities and have met with minimal success. There has been increased action on the 1940-42 proof sets, as buyers specify "gem sets only".

There are an increasing number of bidders for specific mint sets. A few mint sets are in demand at higher "bids". Those with slight gains are 1965 and 67 sms, 1971, 72, and 81 mint sets.

COMMEMORATIVES: If this past week is any indication of how the commem market can really perform, then a couple more auctions might push prices out of sight. The Williams Gallery conducted an auction which contained a number of nice MS-65 commems. The following group of coins sold substantially over ask. Bay Bridge, Columbia, Iowa, Norfolk, and Albany. This is but a few of the nice coins in this particular auction.

TYPE: As can be seen from "The Market in Depth", MS-65 type coins are increasing in demand at higher levels. On bourse floors, they are very elusive; and if located, and if properly graded, they will sell at current or higher levels.

GOLD: MS-63 and MS-65 gold coins are almost non-existent on bourse floors, especially at today's "bid" levels.

Although circulated gold (VF-AU) has not increased in price, some dealers report that inventories are low and they need coins. Several dealers are actively attempting to purchase coins at current "bids".

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $342.50 per ounce.

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63--but may also include some MS 60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

STRONG DEMAND FOR U.S. GOLD IN ALL M.S. GRADES

Silver Proof Sets Still Atop Most Want Lists

The Market in Depth

Now that the holiday season is upon us, what can be expected over the next couple of months in the coin market? For the next few weeks, one can expect inventory stock-piling of the usual gift-giving items. Proof sets, mint sets, and modern sets (Ike's, Kennedy's, etc) are always popular at this time of year. Also in demand will be the gold bullion related coins which are always acceptable as gifts with or without jewelry. As for the rest of the rare coin market, the next three months of coin shows should be a good indication of which direction the market will be headed by the time the circuit hits the West Coast at the always active Long Beach Coin Show.

As for current activity, the whole market appears brighter than it was during the past few months. Amid predictions of higher or lower interest rates, value of U.S. dollar, oil prices, taxes, all factors which may have an effect on the rare coin market, there seems to be a confidence building among dealers, collectors, and investors that the market is strengthening. There is the feeling that there will be an increase in business. There will be new buyers with new money entering into our industry. The skeptics are seeing the dealers educate new enthusiasts, price coins more fairly in relation to the actual grade, and fight for more favorable government regulations. The latter is being done through individual state organizations, as well as, ICTA, (Industry Council for Tangible Assets) a national organization. With the support of these organizations, our industry can lobby (and has lobbied) for regulations that will help make our industry a more viable force in the business world.

Morgan dollars are receiving a major portion of the attention nowadays. It seems that there are strong buyers in all grades. Original bags and original rolls are getting steady bidding by a number of dealers. Bags are still bid at $48,000 for common Morgans, while rolls are bid at $810 per. Many dealers are reluctant to bid any higher because they are tired of sending "shots" back. In many cases, dealers say, "quote your best, for original rolls only". As an example of what some finicky dealers are willing to pay for original rolls, one dealer describes a recently purchased lot of original rolls of Morgans. "These coins were taken out of the original tattered paper wrappers, both end coins in each roll were heavily toned"; and asking price was $925 to $950 per roll. The rolls sold immediately and his phone rang continuously for 30 minutes with other buyers "chomping at the bit". There appears to be a gathering momentum for MS-63 and MS-63+ Morgans with "eye appeal".

This Week's Market

CENTS: Most of the BU Lincoln rolls that were active last week are still wanted this week at the same bid levels. The one exception is the 1952-P roll which is now bid at a higher $10.50 per roll. Some of the earlier rolls (1934-1939) are wanted, but at discount prices. So far, buyers and sellers have not crossed paths.

NICKELS: In most cases, BU Buffalo nickel rolls are wanted at current levels as long as they are strictly original. If they are put-together or weakly struck the rolls are discounted.

There is renewed activity in BU Jefferson war nickels, though it appears to be a satisfied series. There are a number of buyers, but they are happy with current "bid" levels. At these levels, the sellers are few and far between, but when they do offer rolls at "bid" the buyers quickly accept the minimal number of rolls available. There are quite a few BU Jefferson rolls on want lists at higher bids. At this point some dealers obviously feel that these rolls are underpriced. The 1954-S roll is up again this week. For other changes, please check pages two and three.

DIMES: A few BU Mercury dime rolls appear on some dealers want lists at higher "bids". They specify, "original rolls only". They will also take quantities of all other rolls at "bid" with the possible exception of 1945-P.

BU Roosevelt dime rolls are finding buyers and sellers contentedly moving rolls at current levels. The only two rolls which have an increase in buyers' bids are the 1958-P ("bid"-$63) and 1959-D ("bid"-$70).

QUARTERS: If there is an inactive area of numismatics, it might be in the MS-65 Washington quarter series. Prices are at a standstill as there has been very little action reported lately for the run of Washington's from 1932-1939.

BU Washington rolls are trading in the "bid/ask" range with the exception of 1953-S, which is higher at $185 "bid" and 1943-S, which is lower at $1725 "bid".

HALVES: The want lists are growing for BU rolls of Walking Liberty halves. After increases over the past couple of weeks for 1941-47 rolls, the numbers of buyers have increased and one more roll has been added to the list. The 1940-P roll shows a higher bid of $2150. Please check page three for increases on other rolls.

The only three rolls of Franklins with higher "bids" this week are 1954-P, 59-P, and 62-D. Most of the other rolls in the $150 to $350 range are trading at current levels. The rolls which "bid" $400 or more are not receiving active buy prices at "bid", but sellers are not actively selling at discounted prices. This is an area to watch in the near future.

DOLLARS: Graded dollars (mostly in Carson City's) and MS-63's are again receiving a lot of attention. There are a number of "plus" signs on page four. Original dollar rolls on the increase are 1883-O, 84-O, 85-O, 86-P, 87-P, 1904-O, and 1925-P.

Ike dollars are still receiving a number of "bids" at last weeks higher levels. There seems to be a few transactions taking place, but some sellers may be waiting for higher "bids".

Anthony dollars have not as yet joined the bandwagon of "plus" signs. There is very little activity to report, as most sellers just do not want to sell at these prices.

PROOF SETS and MINT SETS: The "price war" has not stopped yet. The 1961-63 proof sets slowed to take a deep breath and now have increased to $17 "bid". There are a couple of buyers a little higher, but they are "picky". The 1950 and 51 proof sets are not faring as well. They are both lower this week.

After a few weeks of sporadic increases, mint sets, in general, have settled down to bidding at current levels.

COMMEMORATIVES: Still on the increase is the silver commem market. Specific bidding shows only a few "plus" signs this week, nevertheless there are many buyers that are willing to pay over "bid", but do not want to announce their buy prices, thus keeping "bids" where they are.

TYPE: After the recent auctions, it can be seen that MS-65 type is quite active at current levels or higher if properly graded.

GOLD: This market is becoming extremely active in uncirculated grades. MS-65 gold is very saleable at current levels. Now, there appears to be more and more buyers recognizing the merits of MS-60 and MS-63 coins.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $332.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$35.00 per column inch; 2 column inches maximum

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

VG (60) ... AT ... Sharply struck and cleared showing no evidence ... or friction. However, further qualifications are necessary ... will be bag marked and/or weakly struck may not have ... luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustar (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 -but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63- -but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Superb (MS-67) specimens often bring far more than the MS-65 prices listed below.

STRONG DEMAND FOR PROOFLIKE DOLLARS MEASURED BY HIGHER BIDS

Rash of "Plus" Signs for MS-65 Commemoratives

The Market in Depth

Can history repeat itself? Yes. Does history repeat itself? Sometimes. Will history repeat itself in the rare coin business? Positively---maybe!!! Remember, if and when history does repeat itself, the warning signs may or may not be the same. So one may look for similar conditions or relationships to enable oneself to forecast the coming years. Alas, those signs may not be there; it is quite difficult to predict the future. To this end, many newsletters can attest. Writers have been trying to predict the "ups and downs" of the market for many years. Every once in a while, someone is extremely accurate. When this occurs, the buying public envisions the writer as a soothsayer. Where is the next move? Is it up or down? The soothsayer knows; he is always right. He will tell you on the first Monday after it happens.

In order to deal with reality, one must focus their attention on facts. The volume of business today is perhaps the same, if not, more than it was during the "hot market" of 4-5 years ago. The reason business may, at times seem slower, is that today's business is spread among many more rare coin companies now. Also there are fewer coins available to satisfy a quality hungry buying public.

There are four main types of coin companies. 1. Coin galleries, which sponsor auctions, sell to investor clients, and may have a retail outlet and or mail order. 2. Investment houses, which sell almost strictly to investor clients. 3. Wholesale dealers, who basically sell only to other dealers. 4. The retail coin shop, who sells to the public in their store or through mail-order; they will also sell to other dealers. All these types serve to enhance demand.

If one looks back over the years, one will be reminded of the different areas of the market that were "hot" at various times. Only in 1979-80 was the whole market extremely active. Since then it is one or two areas that seem to be active. Currently, the whole market is very active, although, it can hardly be considered "hot". What makes a market hot? Not rarity. By its very description there are not enough of a rare item to create a hot market. Demand creates a hot market.

The universal problem that is common to all dealers is finding enough of the "right" material to satisfy specific needs for their customers. Whether it be new or used, MS-60 or MS-65, prices will be related to demand. If a particular area of the market is active, many dealers will jump on the bandwagon in order to satisfy those needs. Some of the owners of this material may not wish to sell, obviously feeling prices will increase. When this occurs, one may refer to this material as rare, when in all actuality, it is simply very elusive. The increasing numbers of dealers, collectors, and investors already in this business and those yet to enter, serve to strengthen the many elusive areas of the coin market. So, when complaints are voiced that there is not enough specific material available to satisfy demand, one need not be concerned because business will increase in another area as someone or some condition creates demand.

This Week's Market

CENTS: The 1952-P BU Lincoln roll seems unstoppable as it has increased again this week. Aside from this sought after roll most bidding is taking place at current levels. There is some occasional bargain hunting, but this is usually greeted with minimal success. A few late date proof rolls are lower this week.

NICKELS: Original roll sets of BU war nickels are currently sought. At current levels, there have been no transactions recorded. Most of the recently popular BU Jefferson rolls are still on want lists. Most bidding remains the same, except for a handful of "plus" signs. Those rolls wanted at higher "bids" are: 1940-D, 48-P, 49-S, 51-S, 52-P, and 58-P.

DIMES: An occasional higher bid has been registered for BU Mercury dime rolls. Original rolls from 1934-45 will be quickly bought if offered in the bid/ask range. The 1942-D roll is now "bid" at $1000, while the 1944-D is $725.

BU Roosevelt dime rolls with their weekly price increases have slowed a little, although most are still traded at current levels. There are a couple exceptions as, 1948-P, and 1959-P & D have higher "bids".

QUARTERS: After remaining rather quiet for a number of weeks, BU Washington quarters in MS-65, from 1932-1940, have received renewed interest. Higher bids can be found on page two for a few of the issues.

Buyers for BU Washington quarter rolls are content at current levels. But there is still quite a bit of activity at these levels.

HALVES: There has been quite a renewed interest in various BU Franklin rolls. All of the rolls with increased "bids" are priced no higher than $305 "bid". Quite a few of the issues from 1953-D to 1961-D have increased "bids".

DOLLARS: Since the National Silver Dollar Show a few weeks ago, a sudden realizaiton has set in: In order to buy strict MS-65 dollars, one must pay for them. Whereas, most dealers were not actively trying to raise "bids" because they felt that increased "bids" would not reap any benefits. Now bidders, and there are an increasing number of them, are raising their buy prices, competing for whatever is available. The "plus" signs abound page five for many BU and prooflike MS-65 dollars.

Many of the so-called common date dollar rolls have scored gains this week. Again, dealers are increasing their buy prices in order to compete for availability. As always, rolls must be original.

PROOF SETS and MINT SETS: Scattered "plus" signs for some of the silver proof sets (1956-60) can be found on page five. The 1961-63 sets are still wanted at "bid" with occasional bids just a touch higher, but for limited quantities.

COMMEMORATIVES: What can be said week after week? This market does not let up. The only slowing occurs when buyers restrict their want lists to certain issues. But there's always somebody who wants something within the "bid/ask" range or higher.

Gold commems in MS-65 have seen a few increases. Dealers always search for the difficult to find MS-65.

TYPE: Type coins reveal more than just a few increases this week for MS-65 coins. Reports from many dealers indicate that of the coins they purchased at the recent Bowers and Merena, Inc., Auction, about 70% of the lots have already changed hands as many as three times. This is not only for type coins, but all areas of the market.

GOLD: Despite the weakness of gold bullion, which is near its three year low, U.S. gold is faring rather well. Twenties are active in VF-AU. Uncirculated gold indicates many increases in MS-60 - MS-65. As usual dealers are concentrating on all issues of MS-65. This grade is extremely difficult to locate and most dealers are actively attempting to buy whatever is available and they are willing to pay for it.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $332.10 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$35.00 per column inch. 2 column inches maximum.

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mintt issues) are worth more than listed prices.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65—but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck —and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63—but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

Today's Market Active; All Areas Seem To Be Joining In

The Market in Depth

Some years ago, mid-1980, a few rare coin dealers recognized a "hot" market had come to an end. Obviously, more astute than others, these dealers immediately down-coded their inventories and began selling coins at prices thought to be way under market. History tells us, they knew what the market was going to be and they placed themselves in a cash position, while most other dealers, thinking the "hot" market would never end, were inventory heavy. Not only that, as all would soon learn, the inventories were way over priced.

As amazing as it may seem, the dealers who sold off inventory and put themselves in a cash position are the same ones who are doing well in today's market. That's not to say that one could not hold inventory and do well, but most dealers are not in a position to hold inventory and wait until their coins sell at a profit. And over the last four years many dealers have tried to do, just that. They have refused to sell off old, tired, overpriced inventory. To be involved in today's market, one must be capable of buying at today's prices. If one's capital is tied up in old inventory that one is trying to make a profit on, it restricts one's buying power and ability to participate in the current buy/sell action. One must not dwell on yesterday's coins at yesterday's prices. Get into the now market. Separate old from new. Get rid of past memories; memories are for pictures. Today's market is for action.

CDN: "BELIEVE IT OR NOT"

It has recently been discovered that one of our industry's more astute, dealers has located and purchased two original rolls of '83 and '84 dimes. Big deal, right? They were original 1883 and 1884. You know, the kind of deals one hears about, but rarely sees. We can confirm the fact, "the coins are extremely nice and original"; the 100 coins have already changed hands at the just concluded Washington, D.C. Show. The selling price was very near full MS-65 "bid". There were a couple other potential buyers within five percent. One dealer reported he would pay as much as $3500 each for as many as five or six coins. There were 75-80 which graded MS-65 or better and the remainder were MS-63 and better. If the lot is broken down and individual coins sold singlely, as many as ten coins might sell in the $3500 range, while 70 should sell somewhere between $2100 to 15% over "ask". These prices are on a dealer-to-dealer basis.

By the way, in reviewing grading standards of 15 years ago, there can be found a likely comparison with the standards of today. Coins used to be described as new or used. If they had a touch of rub, they were used. Today: Lo and behold, if a gem BU coin has a touch of rub, it is still used. One can employ all of the descriptive words available in a Webster's dictionary, but a touch of rub indicates a used coin. This is the main reason it is difficult to locate truly original MS-65 coins today. When MS-65's are available they readily sell. Some argue, that in order for an MS-65 to sell in the bid/ask range, it must be an MS-67. Now come on. When one encounters the rare MS-67 coin one just looks upon it with admiration and says, "WOW", "Holy Moly". "I'm not going to sell this coin." The same words were used 15 years ago when locating a wonder coin, 10 years ago when purchasing an MS-67 , and 5 years ago when an MS-67 could be located. These are the coins one tried not to sell. These coins make collectors out of dealers. Unless of course, the price is right. Putting it simply, if the coin was an MS-67 of yesteryear, then it is an MS-67 today. And an MS-65 should be a nice clean attractive no excuse coin, which one would like to have the opportunity of repurchasing someday.

This Week's Market

CENTS: Consistent buyers of BU Lincoln rolls are still few and far between. Although early rolls are almost always in demand, the later rolls rarely receive any bidding at all. Most sellers will not "blow off" material unless the lots are mixed, and usually some of the rolls are spotted. The good news here is that there were no "minus" signs. Nevertheless, interest is lacking.

NICKELS: Like the Lincoln rolls, the Jefferson nickel rolls are also quiet. The recently "bid" up rolls are still actively sought; only at current levels. War nickel rolls and Buffalo rolls are active at current levels.

DIMES: BU Mercury dime rolls are still wanted if they are original. The 1944-D roll is leading the way at a higher $750 "bid".

The Roosevelt dime series is still trading at "bid" levels. The price of silver drifting lower seems to have slowed a few of the higher bidders. Many are confident that silver will make a strong comeback, but until it at least stabilizes, it will continue to have some effect on this market.

QUARTERS: A few of the early mintmarked Washington quarters are wanted in MS-65. The problem in this series is not uncommon, but it is somewhat confusing. To the naked eye, many Washington quarters look like gems. But, when a magnifying glass is used, up pops various little pin marks, which immediately causes the grade to drop.

As in Roosevelt dimes, BU Washington quarter rolls are active at current levels, but that's as far as it goes. The only silver roll higher this week is the 1958-D roll. The late date 1982-P roll is higher at $19.50 "bid".

HALVES: BU Walking Liberty half rolls appear to be taking off. With the exception of three rolls, every roll from 1940-P thru 1947-D is up this week (ninteen "plus" signs). The rolls must be original, as the several buyers specify, "no postage burners".

Franklin rolls are still high on several dealers' lists. They have refrained from raising most "bids", but a few of the moderately priced rolls have increased this week.

DOLLARS: Quality dollars, that's what they want. Several dealers are very actively attempting to purchase MS-65 prooflike dollars. They are pulling out all the stops, as "bids" increase almost across the board. There are not as many "plus" signs for MS-65 dollars, but don't let this fool you. Many dealers are looking for MS-65 dollars in order to satisfy client demands.

Ike dollars have been making a mild run for the last three weeks. Strangely, not many dealers are willing to sell yet. This, after all the complaining of no activity in this series for a long while.

PROOF SETS and MINT SETS: Silver proof sets (56-64) are very steady at current levels with a few reaching recent highs. There seems to be no let up in demand.

The 1983 and 1984 Prestige sets are very difficult to locate at this time. This is chiefly due to the holiday buying.

COMMEMORATIVES: Needless to say, gem commemoratives are still on a rampage. This very popular series just keeps getting stronger. The Lafayette dollar is now "bid" at $5750 in MS-65, and there is more than just a couple buyers.

MS-65 gold commems also indicate many price increases. Keep away from coins that have tiny pin holdes or marks.

TYPE: There are substantial increases in MS-65 type this week. Several dealers need an extremely large amount of nice coins for their growing list of clients. Proof-65 type is also needed at higher levels.

GOLD: Circulated U.S. gold is somewhat steady for the holiday season, despite lower gold bullion. MS-65 gold is still in demand with a few scattered gains.

SILVER: This is a new section in CDN. It will discuss, in detail, bullion prices and how they relate to the popular silver transactions of today (bars, coins, rounds).

Engelhard 1 oz rounds 80¢
Engelhard 100 oz bars 32¢
Johnson Matthey 1 oz units 80¢
Johnson Matthey 100 oz bars 32¢

These are wholesale prices over spot silver.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $326.50 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$35.00 per column inch, 2 column inches maximum

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices--particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (UNCIRCULATED) Strictly uncirculated—showing no evidence rubbing or friction. However no further qualifications are necessary. It will be bag marked and/or weakly struck, may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustar (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63- but with the additional feature of deep mirror prooflike surfaces both sides.

the COIN DEALER newsletter

Don't get left behind! You need the invaluable price information that your Greysheet updates each and every week. Prices are generally beginning to edge upward. Recent auctions have shown a major increase in activity. The Greysheet updates auction results and trends immediately.

GOOD NEWS

Coin Dealer Newsletter has already changed the color and style of its First Class envelope. According to the U.S. Post Office, this will improve the timeliness of our service, which is already #1 in our industry. Due to increased activity in specialized areas of the coin market, CDN has expanded its coverage. Beginning with the first issue in January, 1985, the Greysheet will reveal its new increased coverage. Page two of the weekly CDN will add Washington Commemoratives (BU & Proof) to the Commemorative section. Commemorative sets will be expanded to include MS-60 and MS-63, along with the MS-65's. Also on page two, one will find the 1982 plain dime.

The Monthly Summary will also have new information. On page three, an MS-63 column will be added to MS-60 and MS-65 $2½, $5, and $10 Indians and $20 St. Gaudens. Under the Lincoln Cent section, 1934-1949 is now included in MS-60 to MS-65. Washington quarters have been removed from the weekly CDN and placed in the Monthly Summary. This section will include 1932-1949, in MS-60 to MS-65. And lastly, on page ten, Proof Singles has been expanded to include MS-63 along with MS-65.

GOOD NEWS

CDN subscription rates have remained the same since 1981. That's 4 years without an increase for the First and Foremost, unbiased pricing guide in our industry. Nevertheless, due to increased costs of doing business, we are forced to raise our subscription rates in order to provide you with the standard to which you have become accustomed.

The new rates will be:

3 months $27	*6 months $50*	*1 year $89*	*2 years $147*
(16 issues)	*(32 issues)*	*(63 issues)*	*(126 issues)*

The good news is that this is only twenty-nine cents more per copy when figured on a two year basis. That's only an 8% increase per year.

GREAT NEWS

In an effort to protect our valued subscribers, for a limited time, you may renew or extend your current subscription at the old rates for 3 months, 1 year, or 2 years. Don't let this opportunity pass. Renew today!

Please extend my subscription:

SEND TO: Coin Dealer Newsletter
P.O. Box 11099
Torrance, CA 90510

Please extend my subscription before the rate increase takes effect. Please enter numbers above name on envelope addressed to you.

CAN YOU BORROW CASH AGAINST YOUR RARE COIN PORTFOLIO?

If you ever bought coins through Hannes Tulving . . .you can!

A leading Southwest savings bank has recently recognized coins sold by **Hannes Tulving Rare Coin Investments** as the industry standard for MS-65 numismatics. If you have ever purchased a rare coin through HTRCI, you can now borrow 50 percent of its *current* replacement value using only the coin itself as collateral!

Now you can get the cash you need at any time without committing your house, car, jewels or any other type of collateral. And you'll still enjoy the profits your coins accrue as they appreciate.

No other rare coin company offers this unique safety-net!

REALIZE YOUR DREAMS

After months of searching, one of our investors recently found the home of his dreams. But he lacked enough ready cash for a downpayment.

Because we had started our new program, he was able to borrow against his substantial rare coin investment portfolio and raise the cash he needed, ***no questions asked!*** He now not only has the home of his dreams, but helpful interest deductions . . .all without having to sell a single coin!

Can you think of a situation where *you* might need instant cash? Buy your coins through HTRCI, and it will be ready when you need it!

BEST PROGRAMS IN THE INDUSTRY

Why would a federally insured savings bank choose to work with HTRCI? Because our grading standards, investment programs and liquidation policies are recognized as ***the best in the industry***. These include:

- A guarantee to repurchase your coins at the same grade at which they were sold for a minimum of wholesale "bid" as reported in the most recent *Coin Dealer Newsletter*.
- Computerized updates every six months on the performance of ***every coin*** in your portfolio as well as total portfolio performance broken down on a percentage basis.
- A conservative approach to rare coin investing that ensures client profits. To date ***not one*** client has ever lost money with an HTRCI portfolio.
- Access to personal consultation with Hannes Tulving, president, grading consultant to ANACS and author of numerous articles on rare coin investing.

For more information on all the outstanding programs offered by our firm, call (800) 854-5179 (inside California) or call (800) 854-6016 (outside California). Or mail the coupon below for a free information packet.

THE INNOVATION OF THE DECADE IS BACK!

And more profitable than ever!

Leveraged Rare Coin Investment Portfolios™

In September 1982, Hannes Tulving Rare Coin Investments, in cooperation with West Coast Bank of Encino, California, announced America's first **Leveraged Rare Coin Investment Portfolios.™** Scores of far-sighted individuals took advantage of this unique buying opportunity. Two years later, *all participants* showed a profit — after all interest payments and service charges!

Now, HTRCI is proud to announce a new, even more attractive rare coin leveraging program. Arranged through one of the Southwest's leading federally insured savings banks, this unique program allows our clients to double their purchasing power at an interest rate even lower than before!

Never before have investors had such an opportunity to increase the profit potential of their rare coin portfolios!

Here's How It Works:

Example: With $10,000, you can purchase $20,000 worth of rare coins with our bank loaning you, the client, the difference of $10,000. The entire portfolio is held by the bank as collateral on the loan.

This concept has three key attractions for the investor:

- The chance to reap greater profits on rare coin investments.
- Interest write-offs.
- Freeing-up of other collateral; only the coins themselves are held against the loan.

Since we opened our doors in 1976, clients of HTRCI have enjoyed an average annual profit of 25 percent. Such profit potential coupled with the additional buying power available through our Leveraged Rare Coin Investment Portfolios,™ make investments through HTRCI an outstanding opportunity.

Unique In The Industry

Hannes Tulving Rare Coin Investments is the *only* rare coin investment company offering leveraged rare coin purchases. Our cooperating bank recognizes our grading and liquidation programs as the industry's best; our coins therefore meet their collateral requirements *in all instances.*

This means HTRCI clients can not only leverage their rare coin purchases, but can use their portfolios as collateral for cash loans through this federally insured savings institution!

No other rare coin company can offer investors such flexibility!

Build Your Dreams Through Us

Here's a chance to build your financial dreams through the most comprehensive and profitable investment programs available anywhere. In addition to our one-of-a-kind leveraging programs, we offer:

- A guarantee to repurchase your coins at the same grade at which they were sold for a minimum of wholesale "bid" as reported in the most recent *Coin Dealer Newsletter.*
- Computerized updates every six months on the performance of *every coin* in your portfolio as well as total portfolio performance broken down on a percentage basis.
- A conservative approach to rare coin investing that ensures client profits. To date, *not one* client has ever lost money with an HTRCI portfolio.
- Access to personal consultation with Hannes Tulving, president, grading consultant to ANACS and author of numerous articles on rare coin investing.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to data.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 --but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

YEAR ENDS WITH OPTIMISTIC OUTLOOK FOR 1985

MS-65 Prooflike Dollars Score Again

The Market in Depth

This is our last issue for 1984. The CDN Family wishes one and all a joyous and safe holiday season. We hope you have had a successful year and your outlook for the new year projects even brighter.

The last couple of months have seen a marked improvement in the volume of business being accomplished. There has been a significant turnaround in dealer and customer attitudes. Customers have seen an improved quality of coin versus dollar spent ratio. Meaning, the ultimate consumer is getting better value for his/her dollar. This is due to the demands of stricter grading by the customers through their education. As dealers attempt to satisfy their profit motive and also bring it in line with what a customer is willing to pay, it can be seen that the rare coin business has improved in the eyes of the buyers.

Although gold and silver bullion have dropped precipitously, it is not having the drastic effect it has had in the past. Collectors and investors are buying coins at a faster rate than they have before under the same conditions. They realize that most of the coins available today will not be available tomorrow. The ultimate consumer is looking for properly graded coins for fair market value believing that this is the time to buy. This belief runs through many of the series and includes grades MS-60, MS-63, MS-65, and MS-67.

CDN has been receiving many reports of increasing business from all over the country. For those who think most of the sales are for MS-65 and better coins---think again. What percentage of all coins that you see grade at least MS-65? The answer is quite low. So the major volume of sales must be for coins in lesser grades. It stands to reason, if MS-65 coins are rarer and more expensive than lesser quality coins, then fewer people can obtain them. Moreover, the easier to locate MS-60 to MS-63 coins which are being bought today at lower prices may be the best buys as more and more new buyers enter the coin market and create a much thinner supply. This may seem too basic and needless to examine, but one must be reminded of the economic law of supply and demand. Granted, most numismatists know the difference between apples and oranges, but it takes a practiced eye to spot the difference in cooking apples and eating apples.

This Week's Market

CENTS: The 1983-P double die cent is in the midst of a grading dilemma. There is a unquestionable two-tiered pricing structure for this reverse mint error; and it's substantial. The latest compilation of sell prices is as follows:

Grade	ANACS	Non-ANACS
AU	$135	$ 95
MS-60	$165	$115
MS-63	$185	$135
MS-65	$325	$225

Buyers of this coin definitely feel it is easier to resell it if it is accompanied by ANACS papers. The price comparison proves it.

NICKELS: Some BU Jefferson rolls appear to be a little stronger each week. They are not increasing a big percentage, but there are buyers trying to locate as many as 50 rolls of each. The rolls with "plus" signs can be found on pages two and three. What can't be seen in the "bid" column are the rolls which are very active at current levels. These are: 1938-D, S, 1943-P, D, S, and 1945-P, D, S.

DIMES: The 1982 no "P" dime is a popular recently minted coin. With this coin there is a distinction between full strike and weak strike. Obviously, the full strike coins sell at a higher level. There is a roll of full strike coins available on the market at $6000.

The silver rolls of dimes, quarters, and halves have been hurt by the major downturn in silver bullion. But not with lower sell prices. BU Roosevelt dimes are just not as active. Most dealers are still interested, but want to see where silver goes. Some dealers continue to bargain hunt, but find only a few specific dates, in small quantities. Contrary to this, the 1955-P and 1958-P were "bid" higher this week.

QUARTERS: Bargain-hunting is the rule. Most dealers have dropped their buy prices, but most sellers are not ready to take losses yet. The 1958-P BU roll is somewhat volatile as some dealers will still pay bid, while others are willing to sell a limited number of rolls at $188 per.

HALVES: BU Walking Liberty half rolls are still very active. Buyers want nice original rolls at the recently increased "bid" levels, but they are being shipped put-together rolls in most cases. So it appears original rolls are difficult to locate in any quantity at current levels.

BU Franklin rolls have really quieted down as many dealers have lowered buy prices. The 1964-P, D, Kennedy rolls have dropped to $70 "bid".

DOLLARS: Carson City dollars remain very active in AU and MS-60. The last few weeks have seen an increase in buy prices in practically all grades. The 1887-S and 97-S have once again moved forward in MS-63. Circulated dollar bags have fallen in conjunction with silver to $10,300.

Prooflike dollars in MS-65 are on a roll. There seems to be a lot of life in this area. Many dealers are looking to stock up for the upcoming FUN show. There are almost as many "plus" signs this week as last. Dealers continue to specify quality at these new higher prices.

The silver BU and proof Ikes continue to show an increase in activity and "bids". Please check page five for prices.

PROOF SETS and MINT SETS: The 1984-S proof set is a little difficult to locate at this time. This occurs every year just before the holidays because they make nice gifts. This is also the case for 1983 and 84 Olympic dollars as most dealers are selling them now for future delivery. The problem here is that the boxes which contain these dollars are not readily available. The 1983-S and 84-S Prestige sets are also in demand and will be somewhat difficult to locate for the next two weeks.

COMMEMORATIVES: Not many increases this week, as many dealers begin their vacations. Demand is still strong for nice coins as many dealers anticipate a strong market after the first of the year.

The Washington commem is in demand at $8 for proof and $7 for BU.

TYPE: Nice type coins are in very short supply. One can argue grading all day long, but if the buyers with the money will not accept the coins as MS-65, then they will not pay the higher "bid". Strict or not, this has always been a fact of life.

GOLD: Many of the U.S. gold coins have suffered a set-back. In VF-AU the drop in gold value has finally hurt this series. There is still great demand for MS-65 quality coins, although they are not easy to locate.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $314.10 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they must be brilliant or have original toning.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark---these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices---particularly the pre-1941 issues. Washington rolls---dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-60 (UNCIRCULATED) Strictly uncirculated showing no evidence of rubbing or friction. However no further qualifications are necessary. Will be bag marked and/or weakly struck may not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. These are well above average coins.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63- -but may also include some MS-60 and MS-65 exemples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.
